## Attendees

A screenshot of a Zoom meeting window titled "Participants (11)". It shows a list of 11 participants with their names, initials, and various status icons (mute, video, chat, etc.). The participants are: James Butcher (IOTech) (Host, me), Lenny (Intel), Rodney Hess (Beechwoods), Brian McGinn(Intel), Farshid Tavakolizadeh - Canonical, Iain Anderson (IOTech), Jim Wang (Intel), Jim White, Sigg, tonyespy, and Walt (Intel).

Initials	Name	Company	Host	Mute	Video	Chat	Phone
JB	James Butcher	IOTech	Yes	Yes	Yes	Yes	Yes
L(	Lenny	Intel	No	Yes	Yes	Yes	No
RH	Rodney Hess	Beechwoods	No	Yes	Yes	Yes	Yes
BM	Brian McGinn	Intel	No	No	Yes	Yes	No
FT	Farshid Tavakolizadeh	Canonical	No	No	Yes	Yes	No
IA	Iain Anderson	IOTech	No	No	Yes	Yes	No
JW	Jim Wang	Intel	No	No	Yes	Yes	No
JW	Jim White		No	No	Yes	Yes	No
S	Sigg		No	No	Yes	Yes	No
T	tonyespy		No	No	Yes	Yes	No
W(	Walt	Intel	No	No	Yes	Yes	No

## Agenda

- TAF Status
  - 545 Functional tests in total. 4 fails due to [#1028](#) No response body when trigger pipeline with matching device name.
    - PR now linked: [#1034](#)
  - 43 Integration tests
  - 10 Performance tests
- ADRs... **Jim working on updating all of the below give recent feedback**
  - New Device Profile ADR: [#674](#)
  - Metrics
  - UoM
  - North South Message Bus

(plus QA/Test, System Management and UI)

- New tickets to triage
  - Need to be careful with the Consul changes
- Branch PR Process [#3777](#)
  - Discussed on call and agreed we will close this ticket

## Ticket Status

- Core WG [Project Board](#)
  - go-mod-core-contracts
    - Fixed issues
      - [#696](#) Add ServiceName to PingResponse
  - edgex-go
    - New issues
      - [#3872](#) Notification bug
      - [#3871](#) RuleEngine Rules Bug
      - [#3869](#) RuleEngine stream bug
      - [#3868](#) Include ServiceName in Common Responses
    - In Progress issues
      - [#3777](#) This branch is out-of-date with the base branch
      - [#3863](#) Unable to seed post-setup security-proxy config options via a gadget snap
      - [#3860](#) "redisdb" secret incorrectly states username for redis is "redis5"
  - edgex-compose
    - New issues
      - [#214](#) Fix release name in generated headers to be correct.
  - edgex-docs
    - New issues
      - [#673](#) Create documentation for building and running EdgeX outside of Docker
    - In Progress issues
      - [#516](#) Update Swarm for remote Device Service how to for V2 (kamakura/main branch)
      - [#670](#) Need to update running edgex command in 2.1 Jakarta quick start guide
      - [#671](#) Docker-compose up gives an error with gitgiven instructions in Jakarta quick start guide
- QA/Test Issues
  - Edgex-taf [Project Board](#)
    - Fixed issues
      - [#553](#) Test IntervalactionPOST002 failure because scheduler service is not ready.
