

EdgeX Foundry Core Working Group

(plus QA/Test, System Management and UI)

27 September 2022

ATTENDEES

與會者 (6)

EW	EdgeX Working Group 1 (主持人, 我)	
RH	Rodney Hess (Beechwoods)	
CS	Cece Shen	
JW	Jim White	
L-	Lenny - Intel	
ML	Melody Liu	

AGENDA

TAF Status

- Functional tests: Non Security 604 / Security 605 - all passing
- Integration tests: 42 - not all passing,
due to [#307 Got error "Failed to subscribe internal command request" while deploying device-virtual](#)
- Performance tests: 10 - all passing

Any Other Business

- Difficulties of backward compatibility
 - Verify with the latest docker and docker-compose version first
 - [edgex-go #4141](#)
 - [edgex-go #4005](#)
 - Testcases which contain start http server always fail
- Keep the docker compose v1 test script in TAF?
 - Remove compose v1 test script and use v2 only
- Device System Event test is working in progress

Ticket Status

Core WG [\[Project Board\]](#)

- edgex-go
 - Review issues
 - [#4094](#) [Refactor] Move all the db related check to the infrastructure layer
 - Fixed issues
 - [#4165](#) feat: Add NATS Subject for autoprovisioning streams
- edgex-compose
 - Review issues
 - [#290](#) Add external NonSecure MQTT broker for TAF backward testing on Jakarta Branch
 - Fixed issues
 - [#289](#) feat: Enable using NATS Jetstream as default for nats-bus

- edgex-docs
 - New issues
 - [#77](#) build(deps): Bump github.com/hashicorp/consul/api from 1.13.1 to 1.15.2
 - [#109](#) build(deps): Bump github.com/hashicorp/consul/api from 1.13.1 to 1.15.2
- device-sdk-go
 - Fixed issues
 - [#1189](#) Device services subscribe to core command requests via internal messaging and publishes responses to core command via internal messaging

QA/Test Issues [\[Project Board\]](#)

- edgex-taf
 - In progress issues
 - [#702](#) Modify the automation test environment to use compose plugin
 - [#695](#) Implement automation test for device system event
 - Fixed issues
 - [#710](#) Should return 400, when sending post device profile/ resource with invalid units
 - [#707](#) Update script to support secure mqtt message bus
 - [#107](#) Increase IntegrationTest timeout for arm64
- edgex-taf-pipelines
 - In progress issues
 - [#109](#) [BCT] App services and device services use Jakarta and core services use Lavski

NOTES
