

EDGE X FOUNDRY™

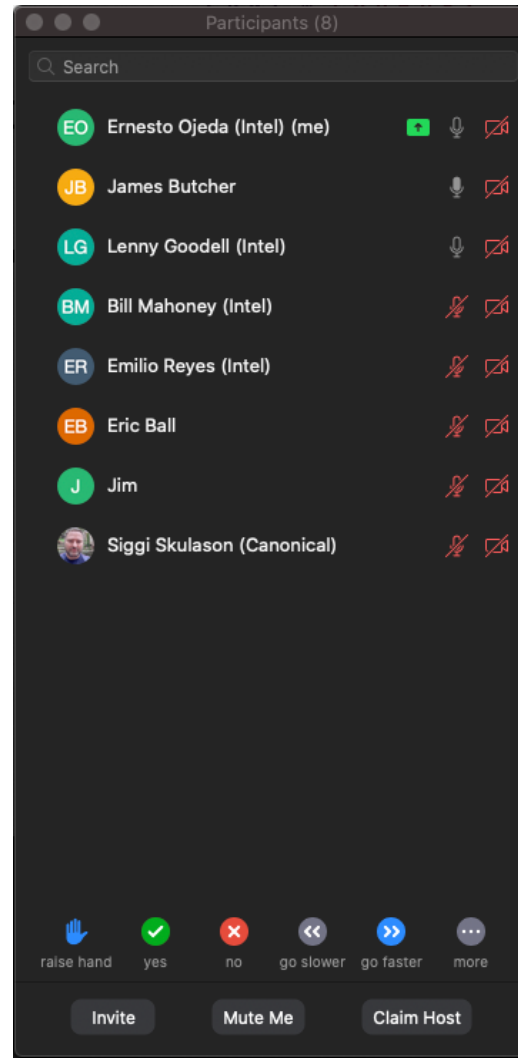

DevOps Working Group

Thursday September 24, 2020

Agenda

Time	Topic	Owner
10 Min	DevOps Updates (Hanoi)	Ernesto
5-10 Min	Blackbox-testing changes for developer-scripts	Ernesto
20 Min	edgex-cli pipeline demo / next steps	Ernesto
10 Min	GitHub Release Demo	Emilio
5 Min	Kanban Board Review	All
5 Min	AOB / Opens	All

Attendees

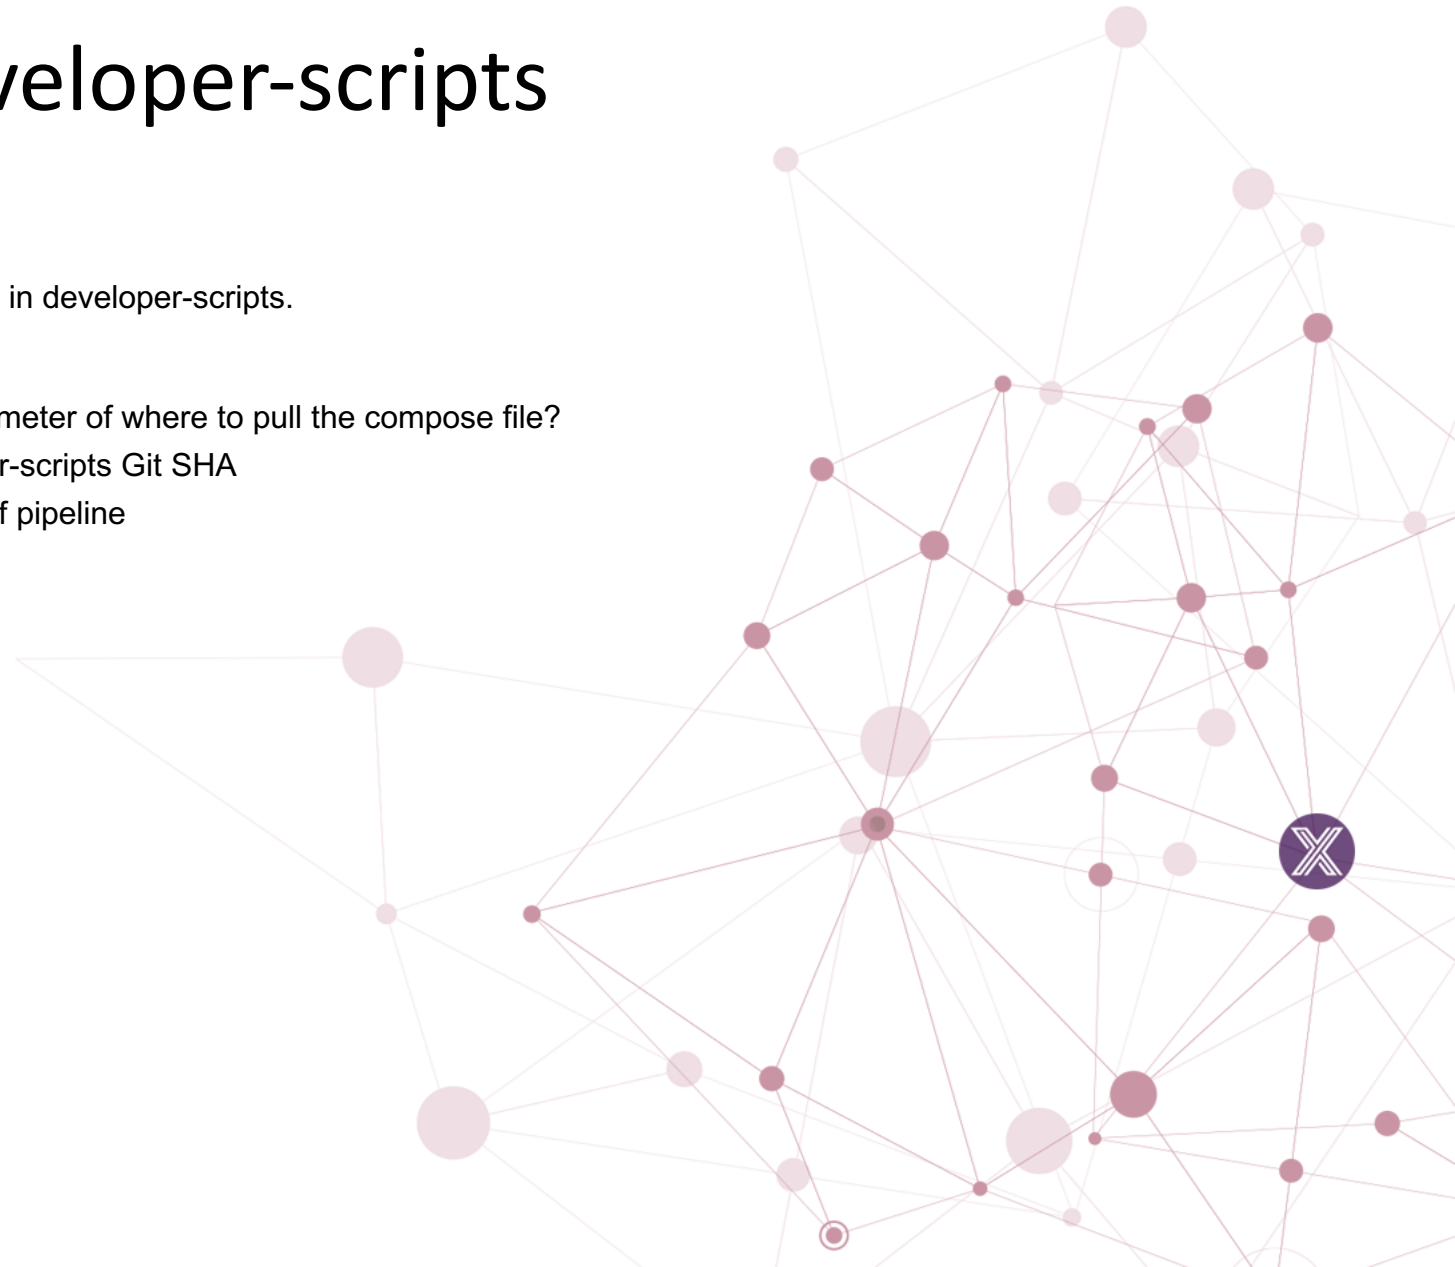

Edgex-taf changes for developer-scripts

Need:

- Kick off edgex-taf smoke tests when developers open PR's in developer-scripts.

Solution:

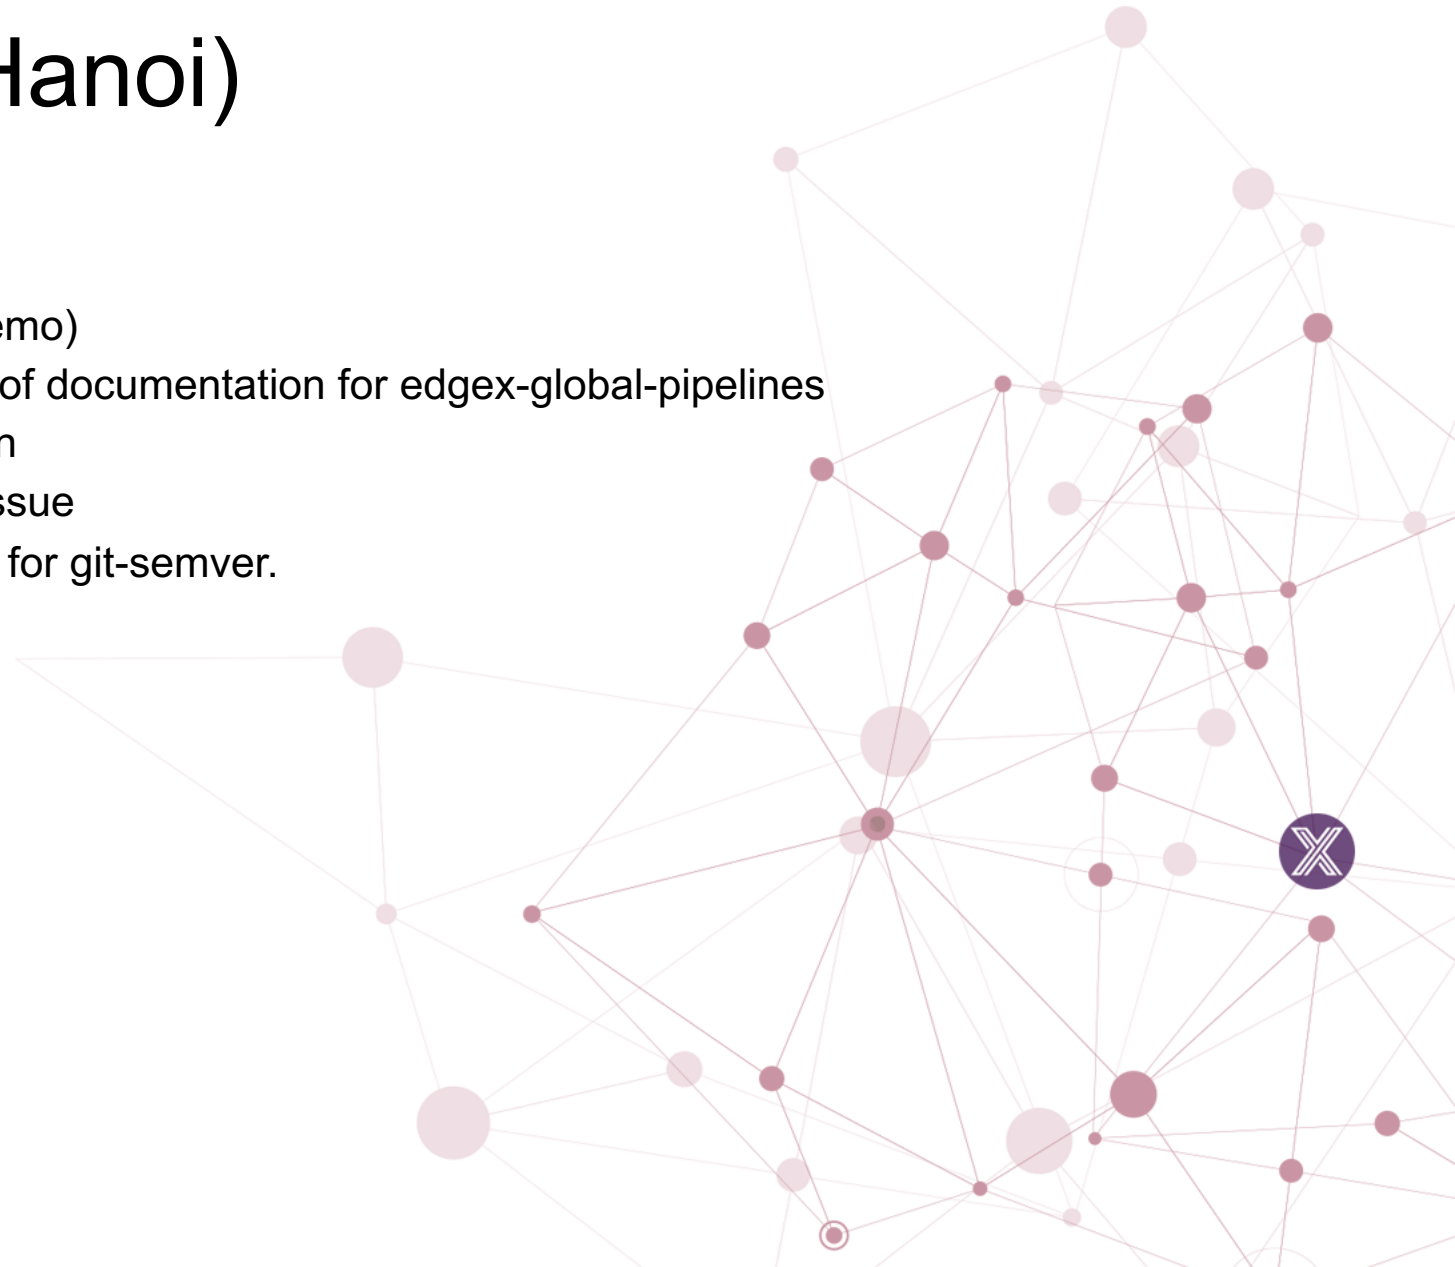

- Modify [edgex-taf/sync-nightly-build.sh](#) script to read a parameter of where to pull the compose file?
- Modify edgex-taf Jenkinsfile to read parameter of developer-scripts Git SHA
- Add Jenkinsfile to developer scripts to kick off the edgex-taf pipeline

DevOps WG Update (Hanoi)

• Pipeline Enhancements

- [#234](#) [Complete] edgex-cli build pipeline (Demo)
- [#195](#) [Complete] Research auto-generation of documentation for edgex-global-pipelines
- [#244](#) [Complete] GitHub Release automation
- [#2698](#) [Complete] Fix swagger DRY_RUN issue
- Misc pipeline library tech debt and bug fixes for git-semver.

Notes

- Ireland Planning Ideas

- edgex-global-pipelines deep dive/training session. 15-30 minutes
- Repo badges for all edgex repos. See <https://github.com/dwyl/repo-badges>, Also version badges to show latest semver version (would need infra to support this).
- Edgex release process demo. 15-30 minutes
- Potentially discuss automated release notes creation now that conventional commits is being adopted (stretch).
