EdgeX Foundry Device Working Group

ATTENDEES

Celine Hsu (IOTech)

Cloud Tsai (IOTech)

Felix Ting (IOTech)

Jim White (IOTech)

Lenny (Intel)

Lindsey Cheng (IOTech)

Rodney Hess (Beechwoods)

Progress

- [device-uart]
    - Move device parameters such as device (i.e., "/dev/ttyUSB0") and baudRate (i.e., 9600) to res/devices/sample-devices.yaml (Issue #15)
    - Add integer read and write support to UART device service #16
- [device-sdk-go] Implement Device Last Connected capability #1470
- [device-sdk-c]
    - Removed space character from the URL for uploading device profile #462
    - Updated Device C SDK page for v3.x
    - Remove the trailing null character from edgex event JSON string #466
    - Fix device validation failure when using mqtt-bus #468

Other Business

- Inter-device update
    - Tom from Eaton mentioned that his team will implement the feature, but not until September.

Device WG [Project Board]

NOTES

- The meeting time will be alternating every other week. Next meeting will be at **GMT 8 am(PT 1 am)** on 17th July for European time.
