Device and Device SDK Working Group
Notes for May 11 2020

Geneva Release

- Go SDK to consume updated go-mod-core-contracts now that PR#241 has landed there
- Unrestricted changes to service names considered harmful:
  - New option "serviceSuffix" to allow unique names while preserving visibility of what kind of service we have
  - "name" option in CSDK to be deprecated
  - **Tony** to create issues
- Go service implementations to be re-rolled following implementation of the above

Profile Linter

- Further to discussions on Apr 20th, general agreement that a tool for validation of device profile definitions would be useful
- **Rodney** to create an enhancement issue
