Device and Device SDK Working Group

Notes for March 14 2022

GPIO Device Service

- Jim has tested and it looks good
- Needs snap configuration updated before release
- Also will wait for RFID to be ready, and release both at the same time

C code style

- Working on a clang-format based setup

Camera device services

- Two new implementations ready for review in -holding
- Support ONVIF and USB cameras
- The former is intended to replace the existing device-camera-go service
- Lenny will review and at least one other volunteer will be sought
