

Device and Device SDK Working Group

Notes for Apr 19 2021

Bluetooth pairing

- HCL team looking into options for managing pairing where authentication is required

Go SDK issues

- #574 – Query results in multiple Events
 - Jim to elaborate on the scenario; async channel may be useful?
- #488 – CBOR for PUT operations
 - Not a priority for 2.0 - descope

Device Service reviews

- GPIO has been updated
- RFID work awaiting scheduling

Move to Go 1.16

- Not yet; depends on successful TAF testing
- io/ioutil will be deprecated; functionality has moved to other packages
