Device and Device SDK Working Group

Notes for October 21 2019

Release Status

- C SDK
  - Fuji issues closed
  - --registry flag without a value: expected tomorrow
- Go SDK
  - Two or three issues slipped: will releasenote and produce a 1.1.1 when they are ready
  - Lenny and Daniel working on the NewCommandValue / NewBinaryValue question
- Existing device services (includes BACnet)
  - Will release 1.1.0 versions with Fuji.
- Camera, REST, OPCUA, Bluetooth
  - 1.0 versions will be released post-Fuji
  - Noted that DevOps support between now and Fuji release (Nov 13th) likely to be very limited owing to release activities
