Device and Device SDK Working Group

Notes for August 8 2022

device-camera-go

- Agreed that this would be deprecated, subject to TSC agreement
- It will be replaced by device-onvif-camera

Proposed use case requirements

- Device parent/child and Extending device data to be raised in Core WG
  - Likely development impact will be on core-command
- Provision Watcher enhancement – need to be clear on how profile name is handled

GitHub discussions

- Unable to remove irrelevant "labels" from the discussion repository
  - Jim to contact Eric Bell at LF
- How do people subscribe so that they get email notifications?
  - Iain to find out and write a post

Next meeting

- August 15th – may cut short depending on attendance / issues
- August 22nd and 29th will be cancelled due to holidays
