System Management WG Meeting: 8/14

Attendees: Jim, Trevor, Akram (Dell), Doug (Analog Devices), Edward, Steve (IoTech), Rodney (Beechwoods), Nick (Thales), Salim (VMWare), Tony (Canonical). Others may have joined after the call started.

Old Business

- Review of version 5 of design document.
  - Clean up remaining discussion around SMA
  - Start review of micro service API
  - See version 6 for updates at https://wiki.edgexfoundry.org/display/FA/Phase+1%2C+System+Management+Delhi+Release
- Security requirements
  - Use of Kong to protect the APIs for Delhi
  - Auditing?? Possible logging tie; not for Delhi

New Business

- Discuss current implementation efforts (Akram)
- https://github.com/akramtexas/edgex-go/commits/sys-management-agent
- Review of blocking API REST calls everywhere – general EDGEX issue
  - General scale issue
  - Performance concern
  - Not a consideration in API design
