## AGENDA

### TAF Status

- Functional tests:
  - Non-Security **612** tests - All pass
  - Security **613** tests - All pass
- Integration tests:
  - Non-Security **132** tests - **2 failed**
  - Security **135** tests - **2 failed**
    - Modify core-data configuration under Writable doesn't take effect before restarting service when using core-keeper as registry service [#4832](#)
- Performance tests:
  - Non-Security **10** tests - All pass
  - Security **9** tests - **1 failed**
    - [edgex.4 Ping Response Time.Ping Response Time.Measure the ping response time](#) [arm64 platform when in a security mode only]

- Means 70 times that response time is over than 100ms when ping core-service/device-virtual/device-rest/app-service

## Progress

### New Issue

- *[From the failed test case]* Modify core-data configuration under Writable doesn't take effect before restarting service when using core-keeper as registry service [#4832](#)
- Core-data service does not log subscription topic [#4843](#)

### In Progress

- [Core Metadata] Add "parent" field to Device objects [#4769](#)
- Create new support-cron-scheduler service [#4834](#)
- Add core-keeper API document [#1361](#)
- Enhance Security Bootstrap to support PostgreSQL [#4836](#)

### Review

- feat(adr):Add an option to use Caddy instead of Nginx [#1360](#)
- Add docs for zero trust/OpenZiti [#1351](#)

### Done

- Create OpenAPI documentation for the new support-cron-scheduler service [#4830](#)
- Add core-keeper service to the TAF compose file which using Consul as registry service [#449](#)
- Update service version to 3.2.0 in API documents [#4841](#)
- Add tests for core-keeper [#899](#)
- Add core-keeper service and use on TAF test [#446](#)
