

EDGE X FOUNDRY™

Vertical Solutions Working Group

July 28, 2020

TSC chair:

Jim White (IOTech) – jim@iotechsys.com

Working Group Co-chairs:

Camilo Dennis (Intel) – camilo.a.dennis@intel.com

Henry Lau (HP) – henry.lau@hp.com

LF Antitrust Policy Notice

EdgeX Foundry meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

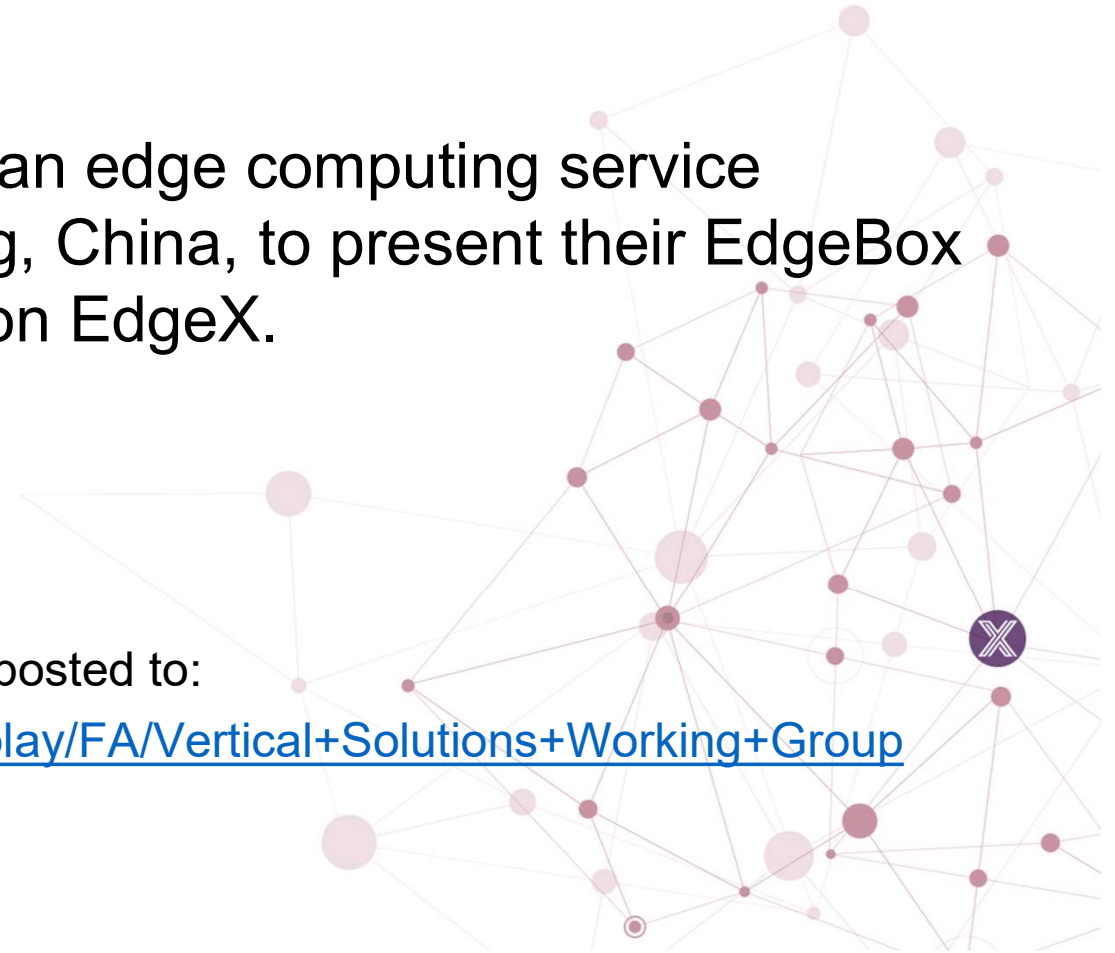

Examples of types of actions that are prohibited at EdgeX Foundry meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

Agenda

Jiangxing Intelligence, an edge computing service provider based in Nanjing, China, to present their EdgeBox platform which is based on EdgeX.

Meeting recording & slides to be posted to:

About JX

Founder Introduction

Dr. Jiangchuan LIU

Chairman & CEO

Professor in Simon Fraser University

Fellow of Canadian Academy of Engineering

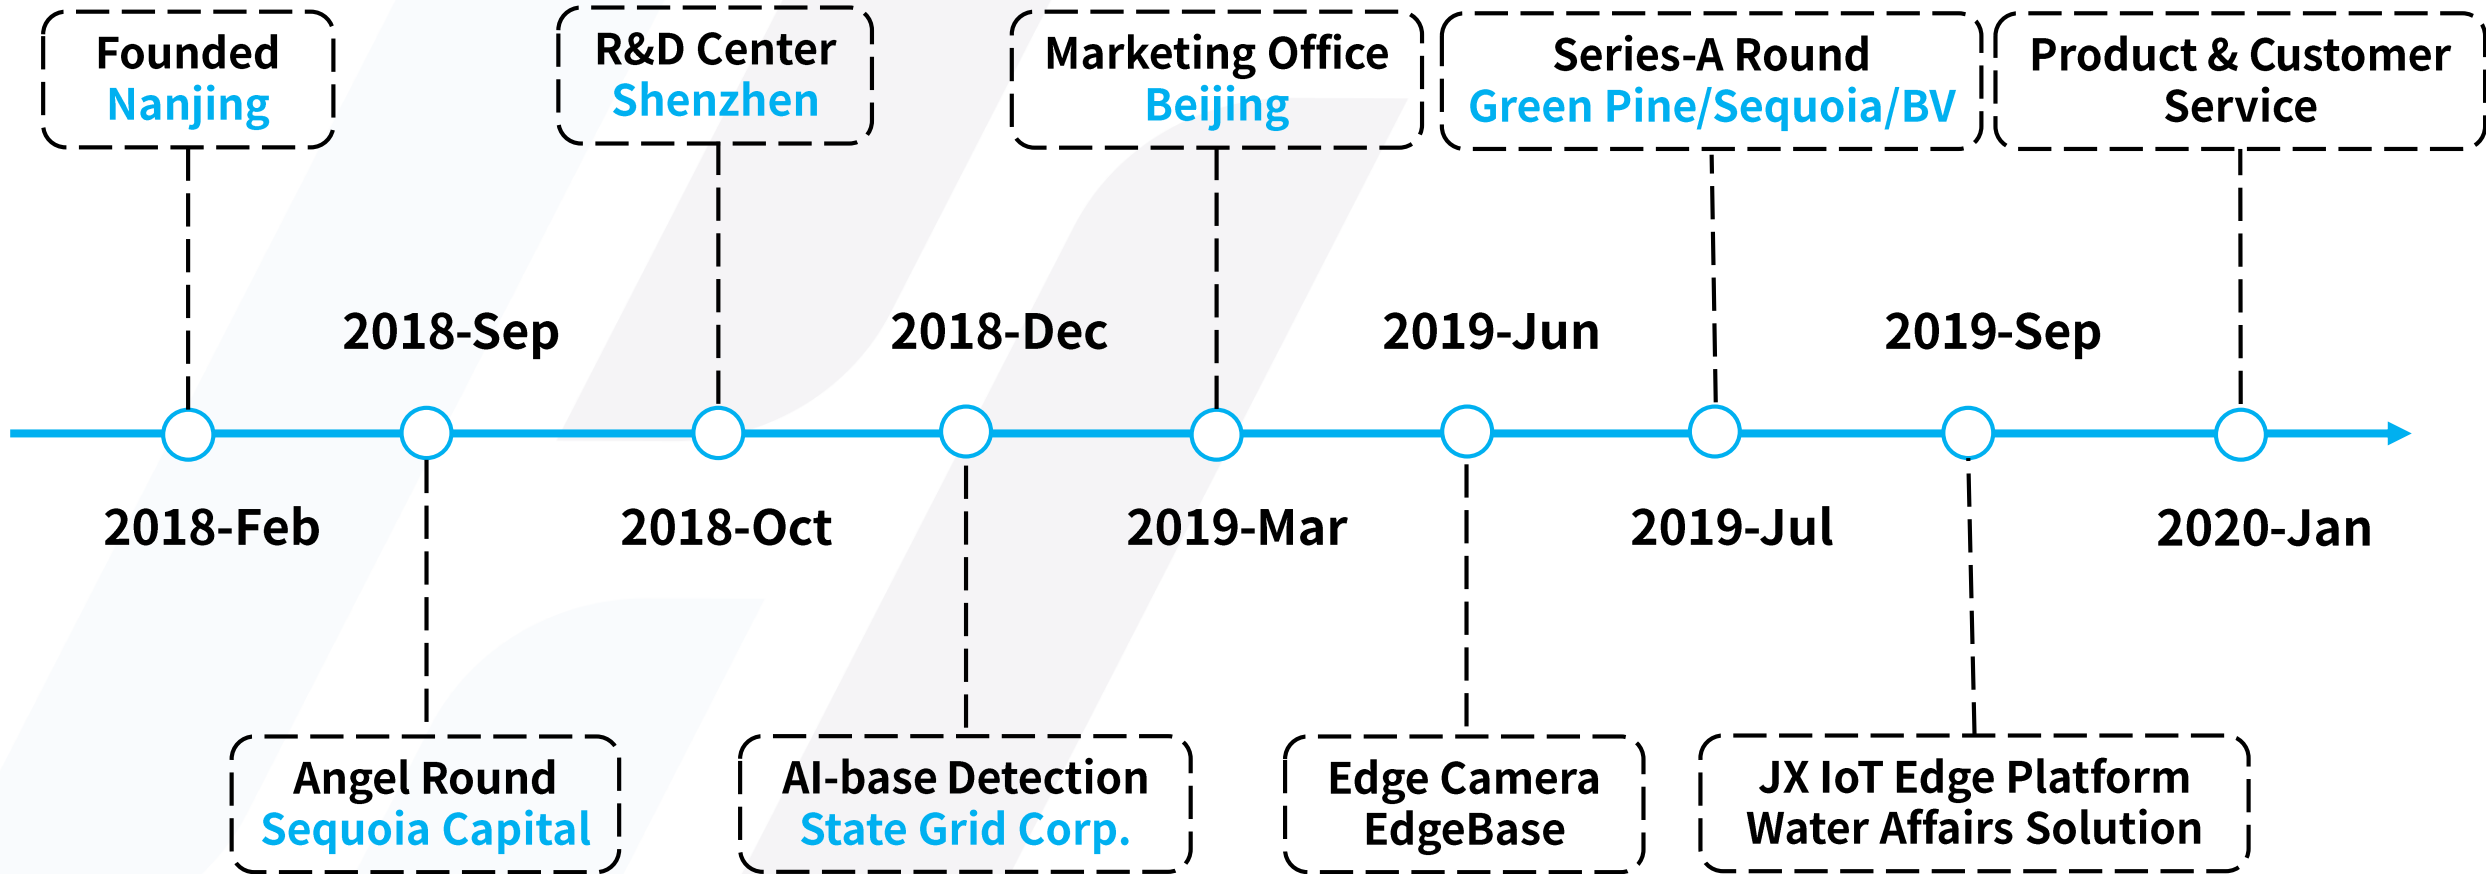

Fellow of IEEE

Microsoft Research Fellow

PhD from The Hong Kong University of Science and Technology

BEng (Cum Laude) from Tsinghua University

Timeline of Jiangxing

50+ employees & ~65% R&D engineers

Partner

Why EdgeX Foundry?

Benefits

1. An ecosystem of interoperable plug-and-play components
2. A microservice, loosely coupled software framework
3. Hardware and OS agnostic

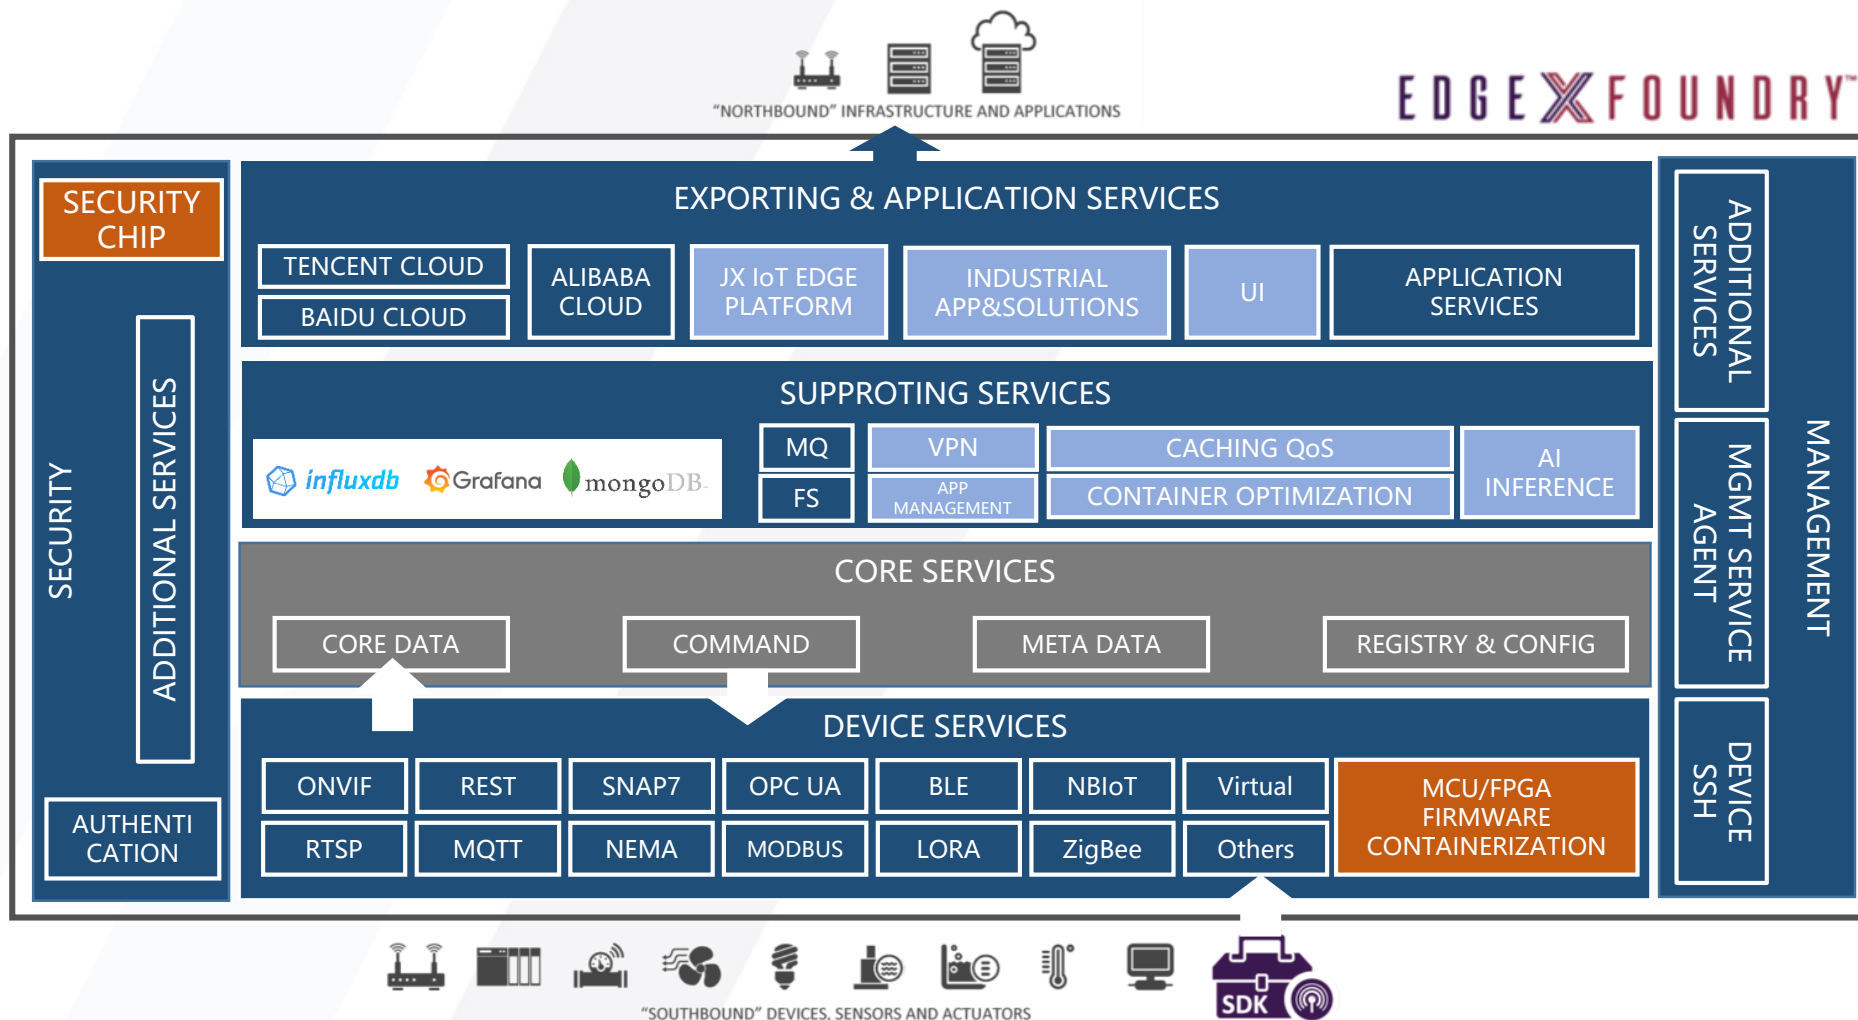

EDGE X FOUNDRY™

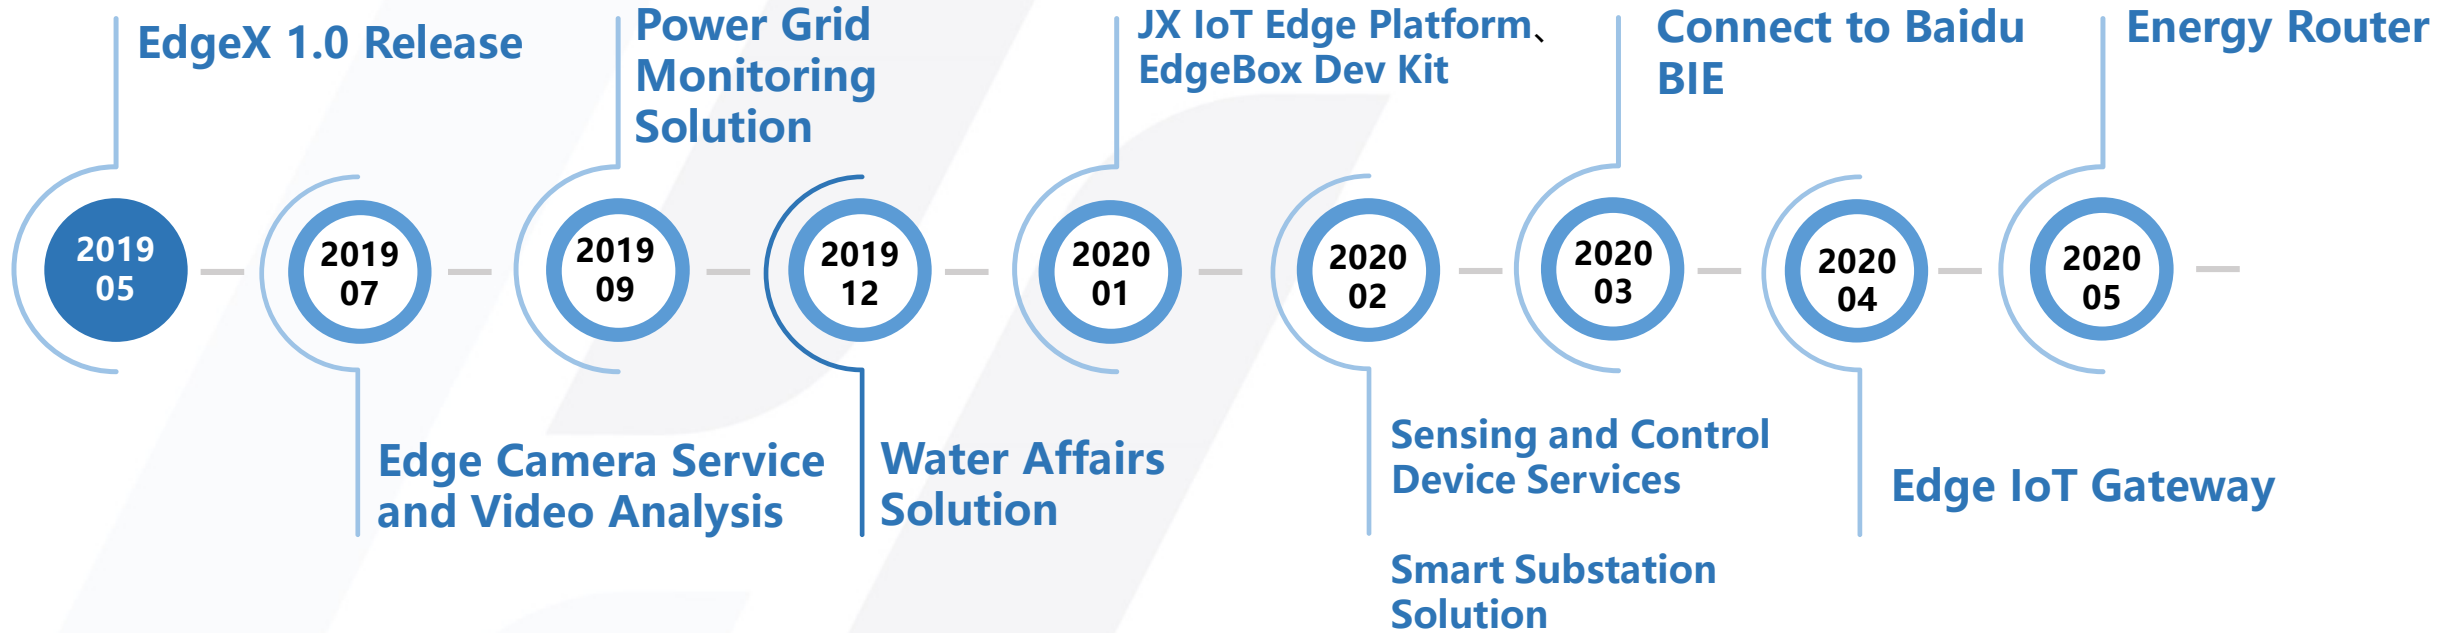

Introduction of EdgeBox

EdgeBox is an advanced AIoT edge computing system

Industrial AIoT Edge Applications based on EdgeX

Commercialization

Grid Company

Power Plant

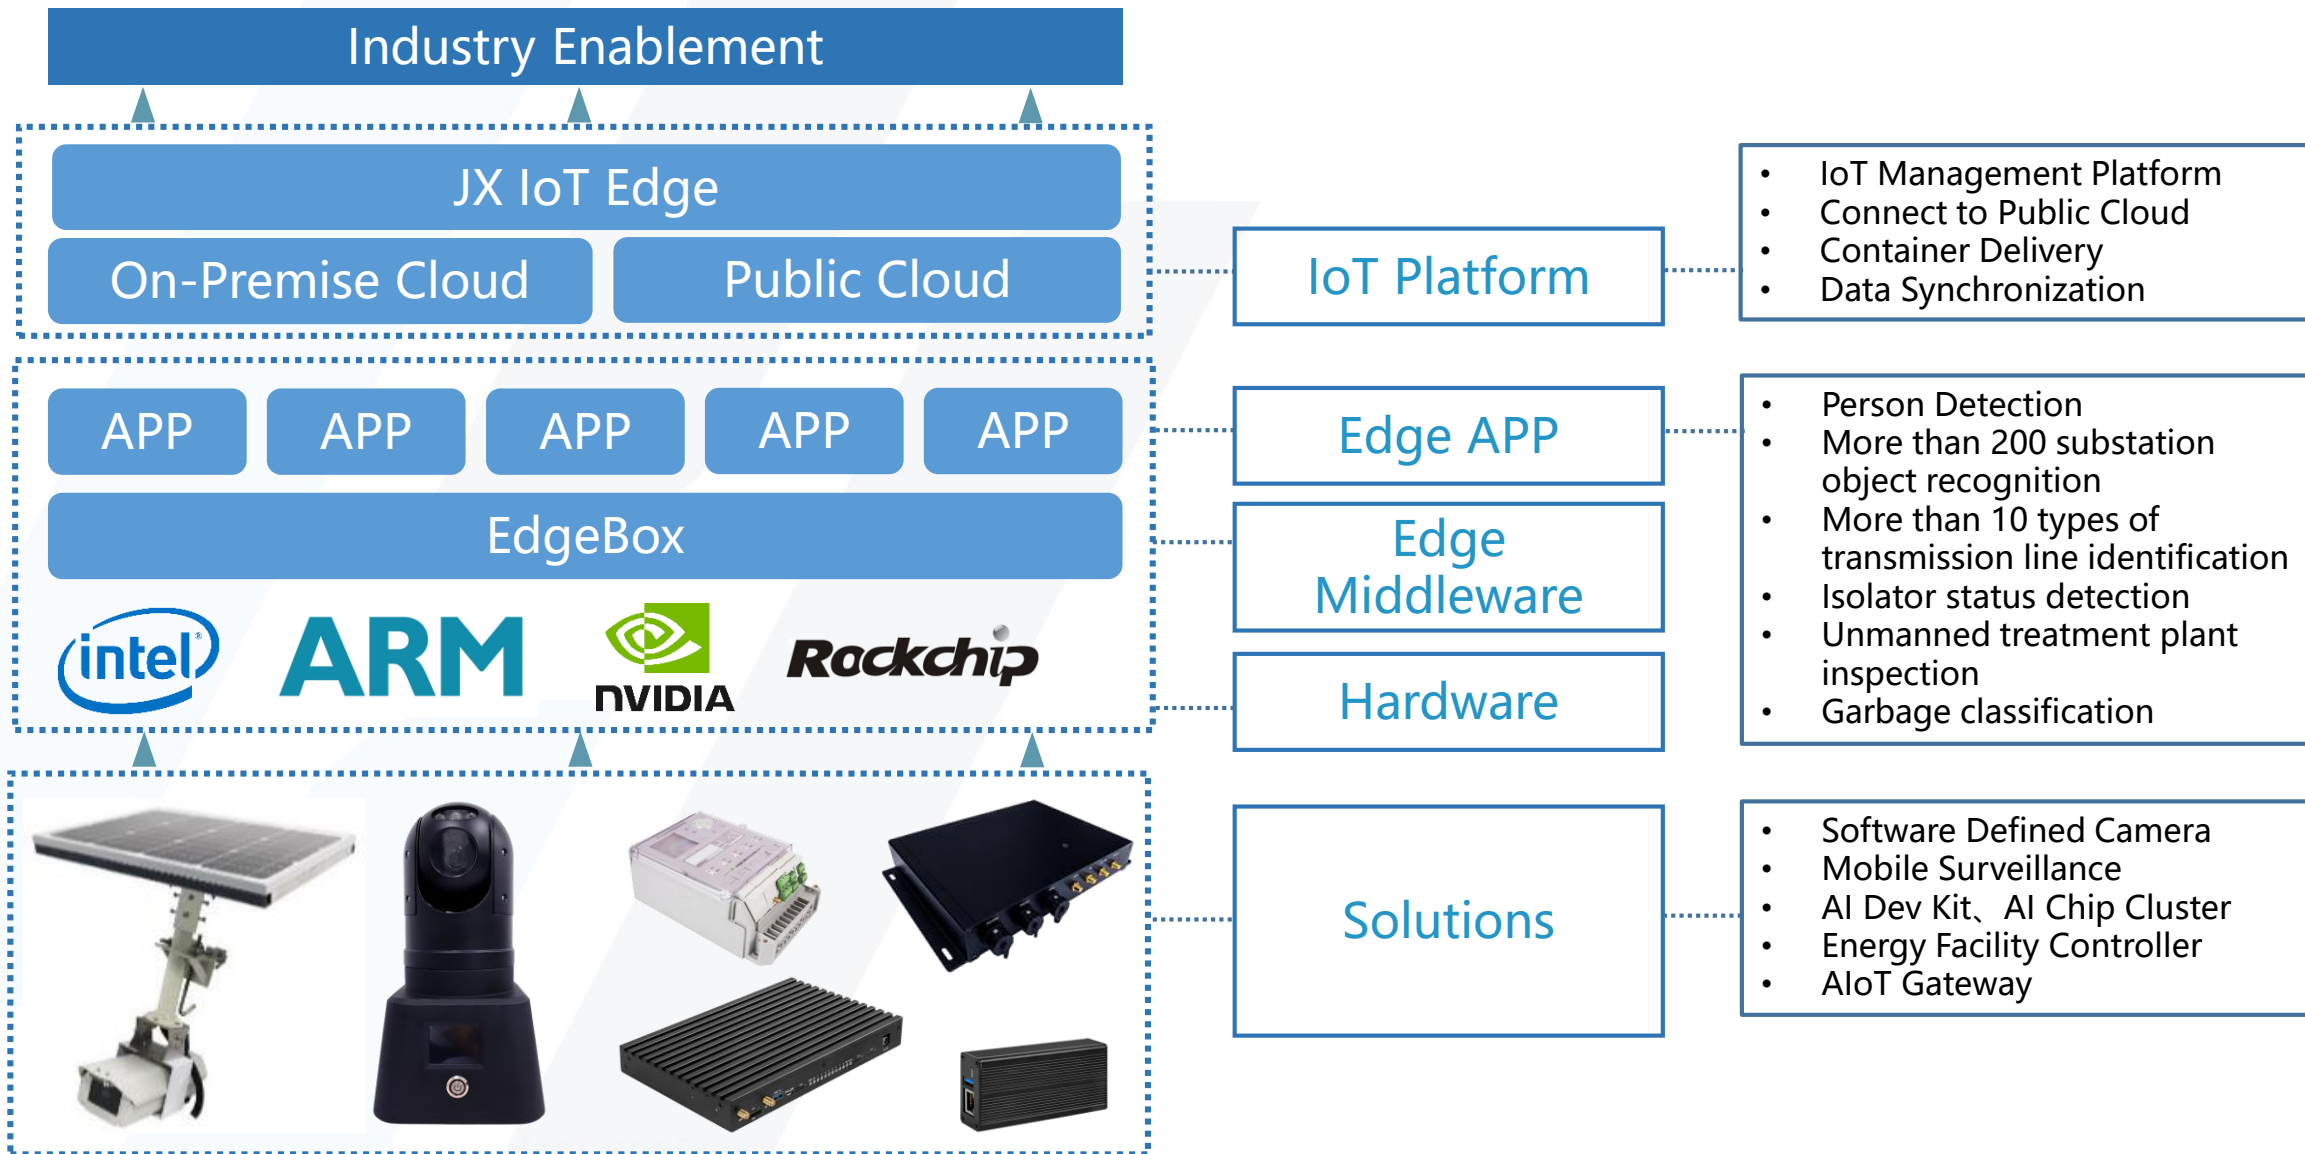

Water Affairs

Products

Products

4

Solutions

Industrial AIoT Applications

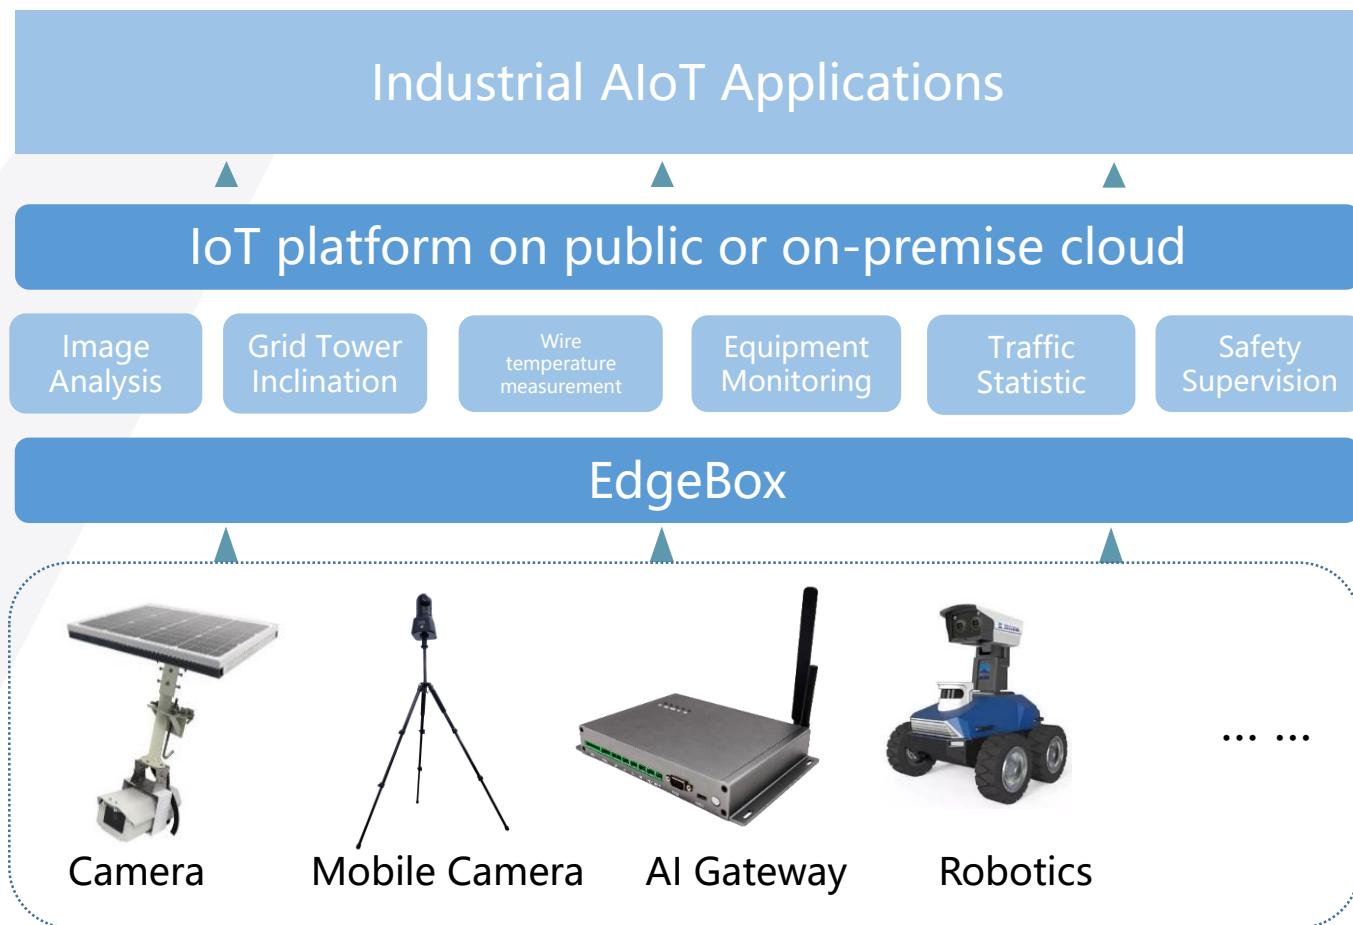

Marketing Cap

The annual market scale of electric power industry AI-Ops is 50 billion CNY.

Tech Advantages

Typical Customers

Energy Facility Controller

Background Info.

The capacity of power distribution transformer cannot match the load requirements of charging piles, especially in metropolitan.

- Costs too much for the power grid company to match.
- Each vehicle uses a pile, even fully charged, low efficiency.

Energy Controller with **containerized charging scheduler App**

- Connects charging piles, solar power sys. and power storage sys, etc.
- Schedule the charging load to balance the load peak.
- Save the power distribution sys. investment & the users' charging cost

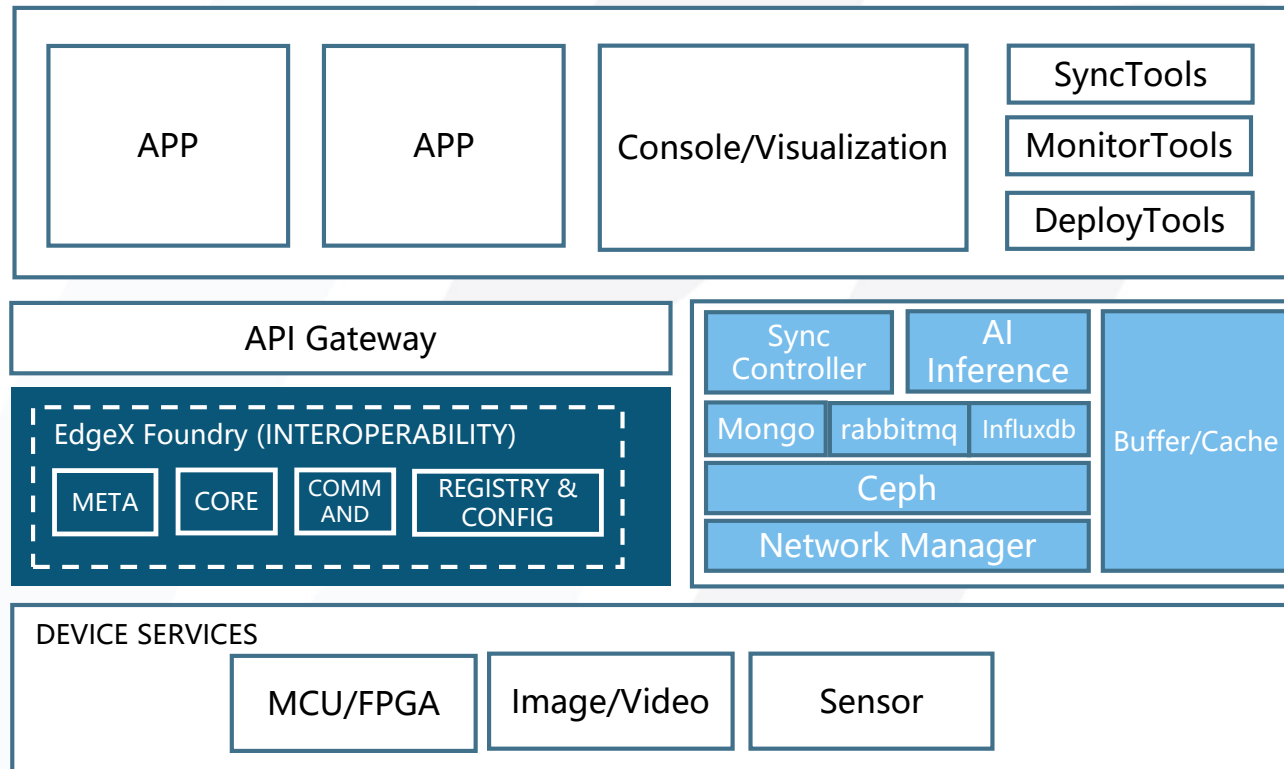

Other applications with containerized Application:

- Power load inferences
- Power quality monitoring
- ...

EdgeX @ Power Grid IoT

Based on EdgeX Foundry and EdgeBox framework, we developed AIoT applications to address the practical challenges in power grid scenarios.

Challenges:

1. Heterogeneous devices
2. Industrial AI inference
3. Quick Application Development
4. Generic Network Configuration
5. Monitor/Deploy/Sync tools

Future Work

Our Roadmap

1. More convenient Dev and Deploy tools
2. AI Notification using EdgeX
3. A new resource management design
4. Faster video streaming analysis
5. Energy saving strategy

Helps from EdgeX Foundry

1. Lower performance overhead
2. Device registration optimization
3. High-availability service
4. More convenient UI
5. Compatible with more frameworks, e.g., NV DeepStream

Q&A

Cong Zhang (Alex)

R&D Director

Email: zhangcong@jiangxing.ai

Danyang Song (Arthur)

EdgeBox Project Director & Senior Specialist

Email: songdanyang@jiangxing.ai
