

# IOTech and EdgeX

## The EdgeX Adopter Series

---

January 19<sup>th</sup>, 2021

# Today's Agenda

- Edge Market Trends
- IOtech Snapshot
- Leveraging EdgeX
- Our Products
- Edge Xpert
  - Architecture
  - Device & Cloud Connectivity
  - AI & Computer Vision
- The Time-Critical Edge
- Edge Management at Scale
- Customer Use Cases
- EdgeX Futures
- Q&A

# Today's Presenters

## **Keith Steele** | IOTech CEO

- 30-year Global Middleware pioneer and entrepreneur
- Proven record of starting and growing successful software companies
- Champion of Open Standards in Distributed and Embedded Computing
- Founding Chairman, EdgeX Technical Steering Group, Marketing Outreach TSG Chair

## **James Butcher** | IOTech Product Manager

- Responsible for Edge Xpert product strategy, roadmap and delivery
- Previously IOTech Solutions Architect helping customers with EdgeX
- Dedicated to usability and performance of IOTech products
- QA & Test Working Group Chair, EdgeX Foundry

# Market Trends & IIoT Snapshot

# State of the IoT Edge

- The leading verticals in Edge growth/investment
  - Industrial, energy & utilities, transportation and logistics lead the way, but some new areas are growing fast
  - Healthcare IoT - \$534.3B by 2025
  - Smart City - \$124B in 2020
  - Retail - \$36B in 2020
- The Edge market trends – what we are seeing:
  - Customers want more ‘solutions’ than pieces/parts – Vendor collaboration
  - Proprietary versus flexibility to bring (or select) best of breed applications (analytics, cloud, visualization, ...)
  - **Increasing adoption of AI/ML at the Edge e.g., Video inferencing becoming a key application at the Edge across multiple verticals**
  - Zero touch
    - “Plug it in and it works” management
    - Automatic sensor / device provisioning
  - **Hybrid Cloud/Edge - Acceleration from fully centralized cloud-based systems to distributed architectures driven by edge computing**

# IOTech: The Edge Software Company

- **We accelerate 'Time to Value' for solutions at the IoT Edge**
  - Shield our customers from complexity
  - Configuration versus coding
- **Our Products:** Edge Application Enabling Platforms & Tools supporting the rapid development, deployment and management at scale of software applications at the IoT Edge
- **Open and vendor neutral:** We enable best of breed user choice – cloud, silicon, hardware, application and minimize vendor lock-in
- **Horizontal edge stack** with ready-made vertical specializations
  - Retail, Utilities & Energy, Smart Venues, Manufacturing, Transportation
- **Go-to market strategy through Global partner network**
  - Our GTM Partners include: Dell Technologies, Microsoft, Intel, Accenture, HP, Schneider Electric, AWS and Google

# Leveraging EdgeX

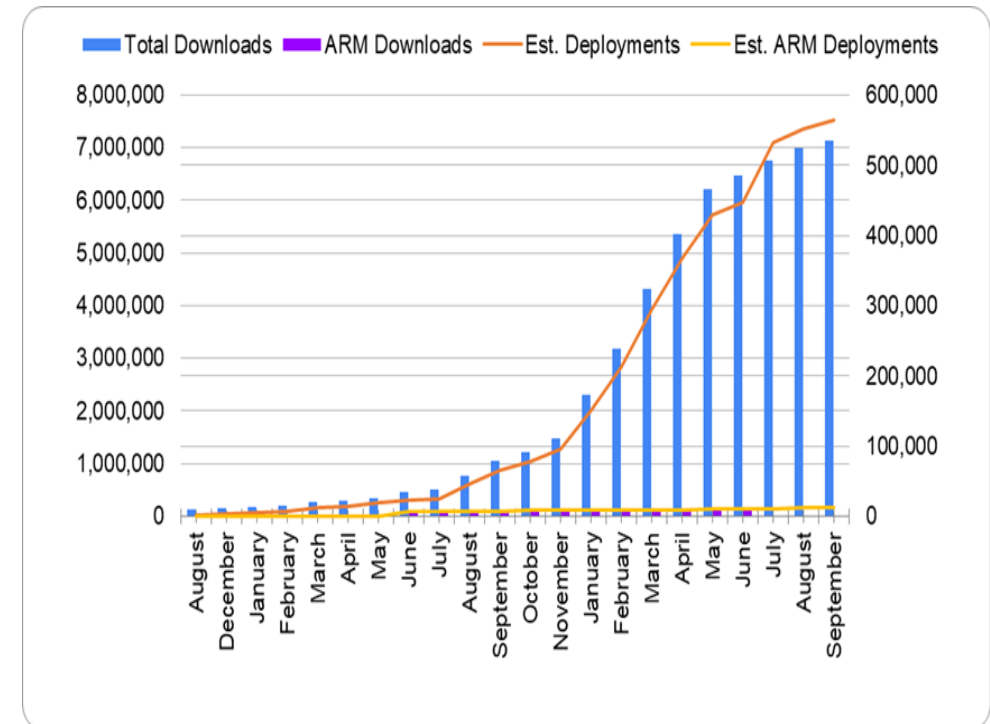

# Leveraging Open Source & Ecosystems

- Over 180 EdgeX contributors
- >7 million container downloads
- ~ 500K deployments
- ~ 6K website users a month
- ~ 30 global contributors per month
- > 150 commits per month

- Standard Open API's
- Utilize broader development specialties
- Leverage larger ecosystem of companies
- Faster to GTM
- Save development costs
- Cross pollination with other OS projects
- Well tested

# IOTech – A Major EdgeX Community Contributor

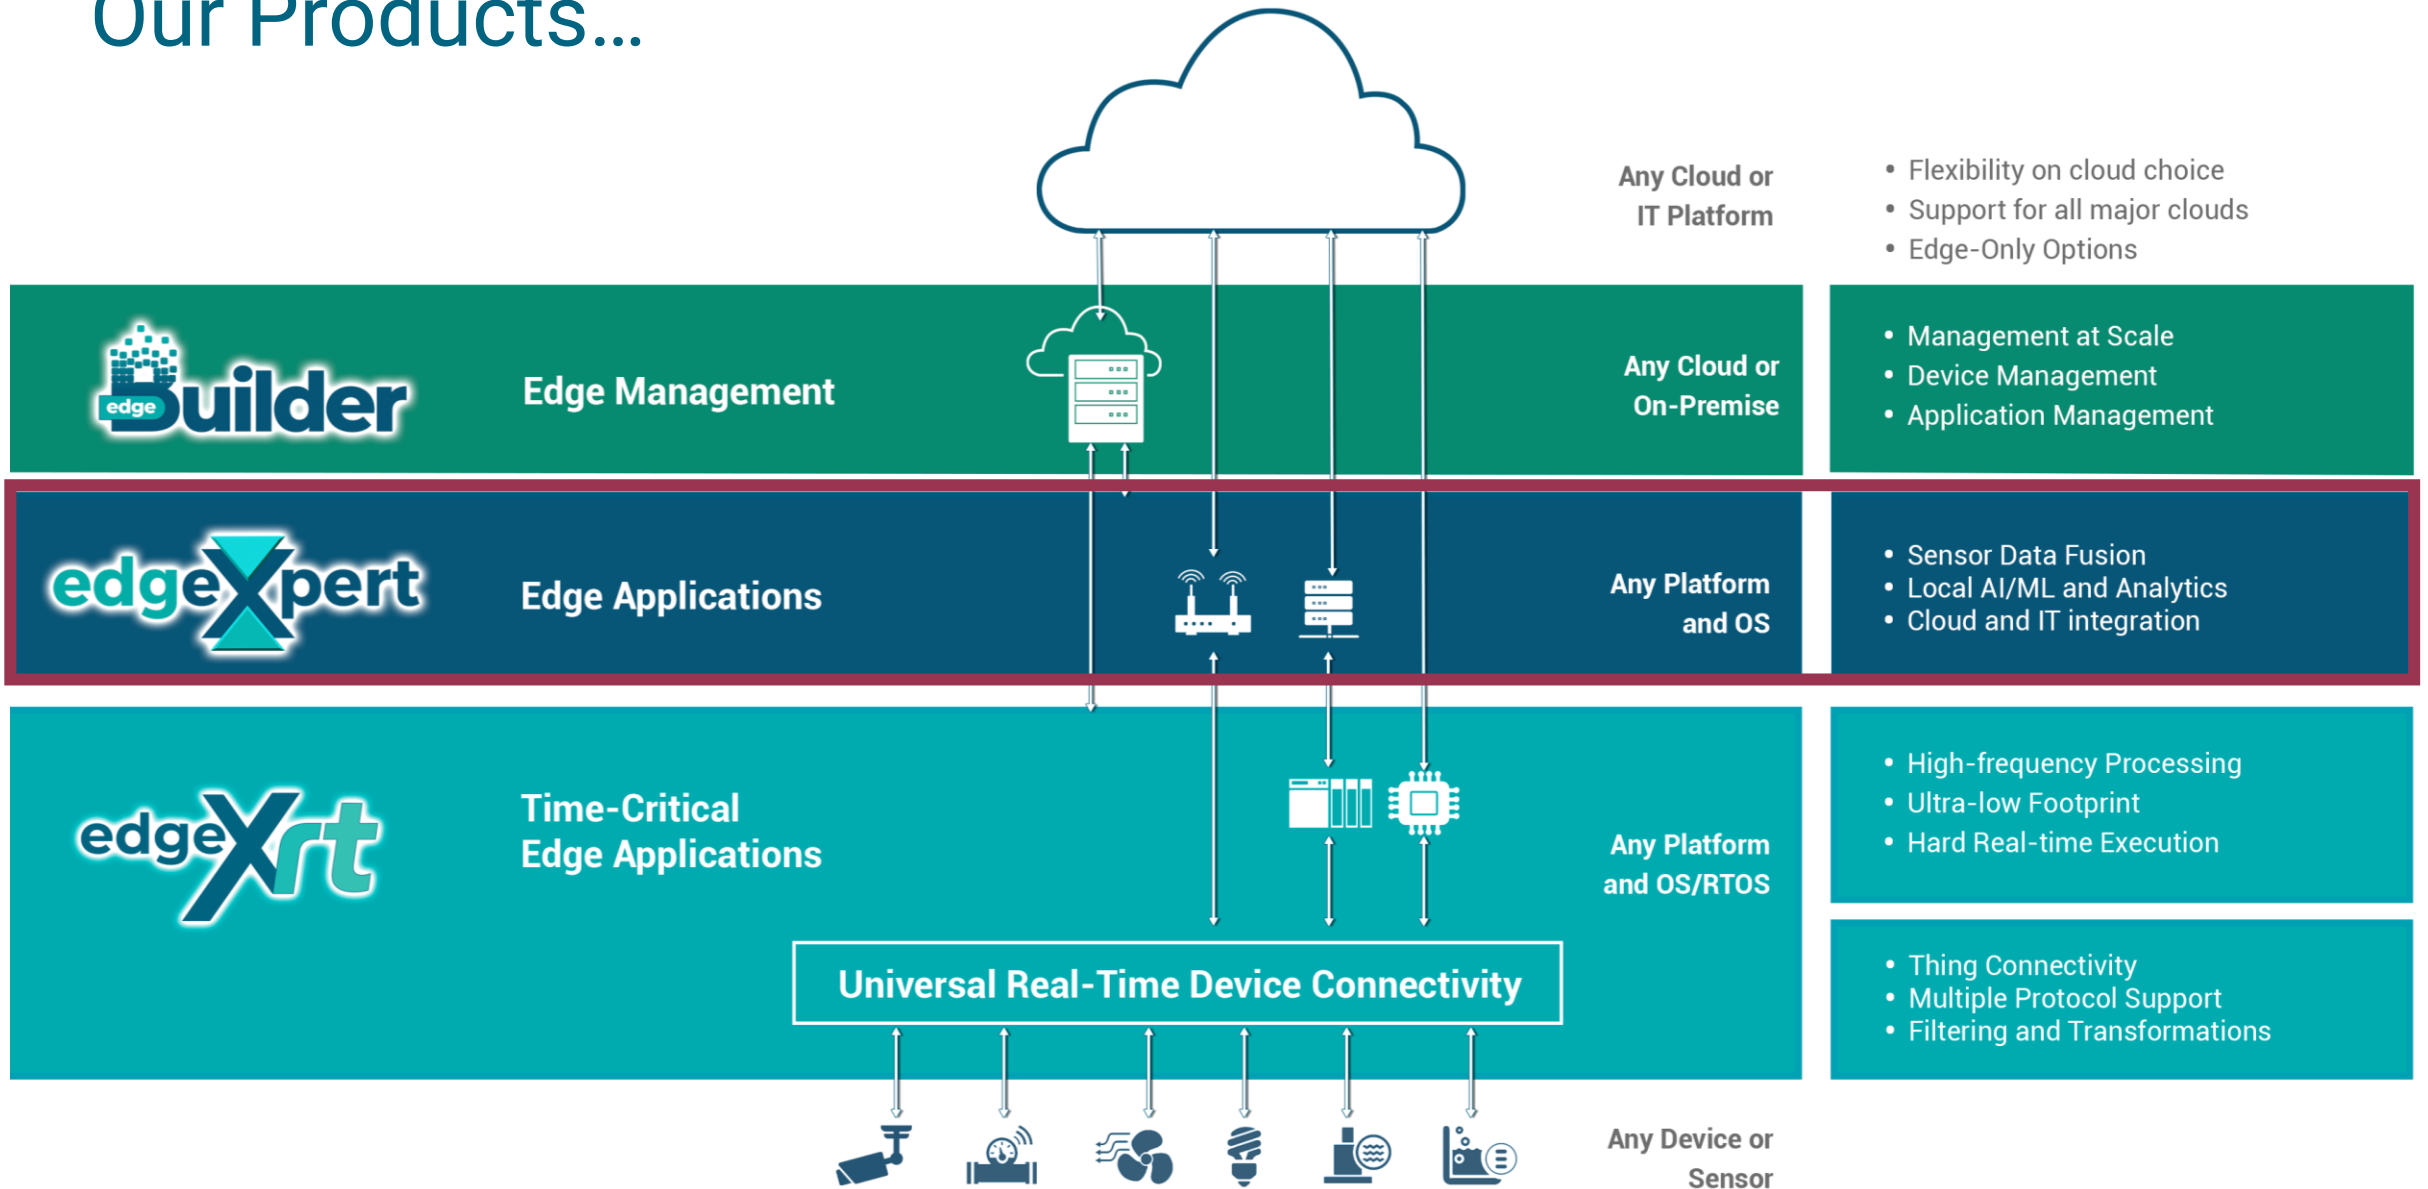

- A founding member of EdgeX
- We have led the EdgeX Foundry's technical steering committee since its inception in 2017
- IOTech team members have made over 1100 commits and ½ million lines of code to EdgeX Foundry (2nd largest contributor)
- IOTech have played a key role implementing EdgeX Device Service SDK and overall Test and QA processes
- Outstanding innovation and contribution awards to Andy Foster and Cloud Tsai
- Major contributor to EdgeX marketing team, including leading the EdgeX website update
- Currently 4 TSC members from IOTech – Jim White, Keith Steele, Iain Anderson, James Butcher
- We know EdgeX!

# Our Products...

# Our Products...

# Edge Xpert

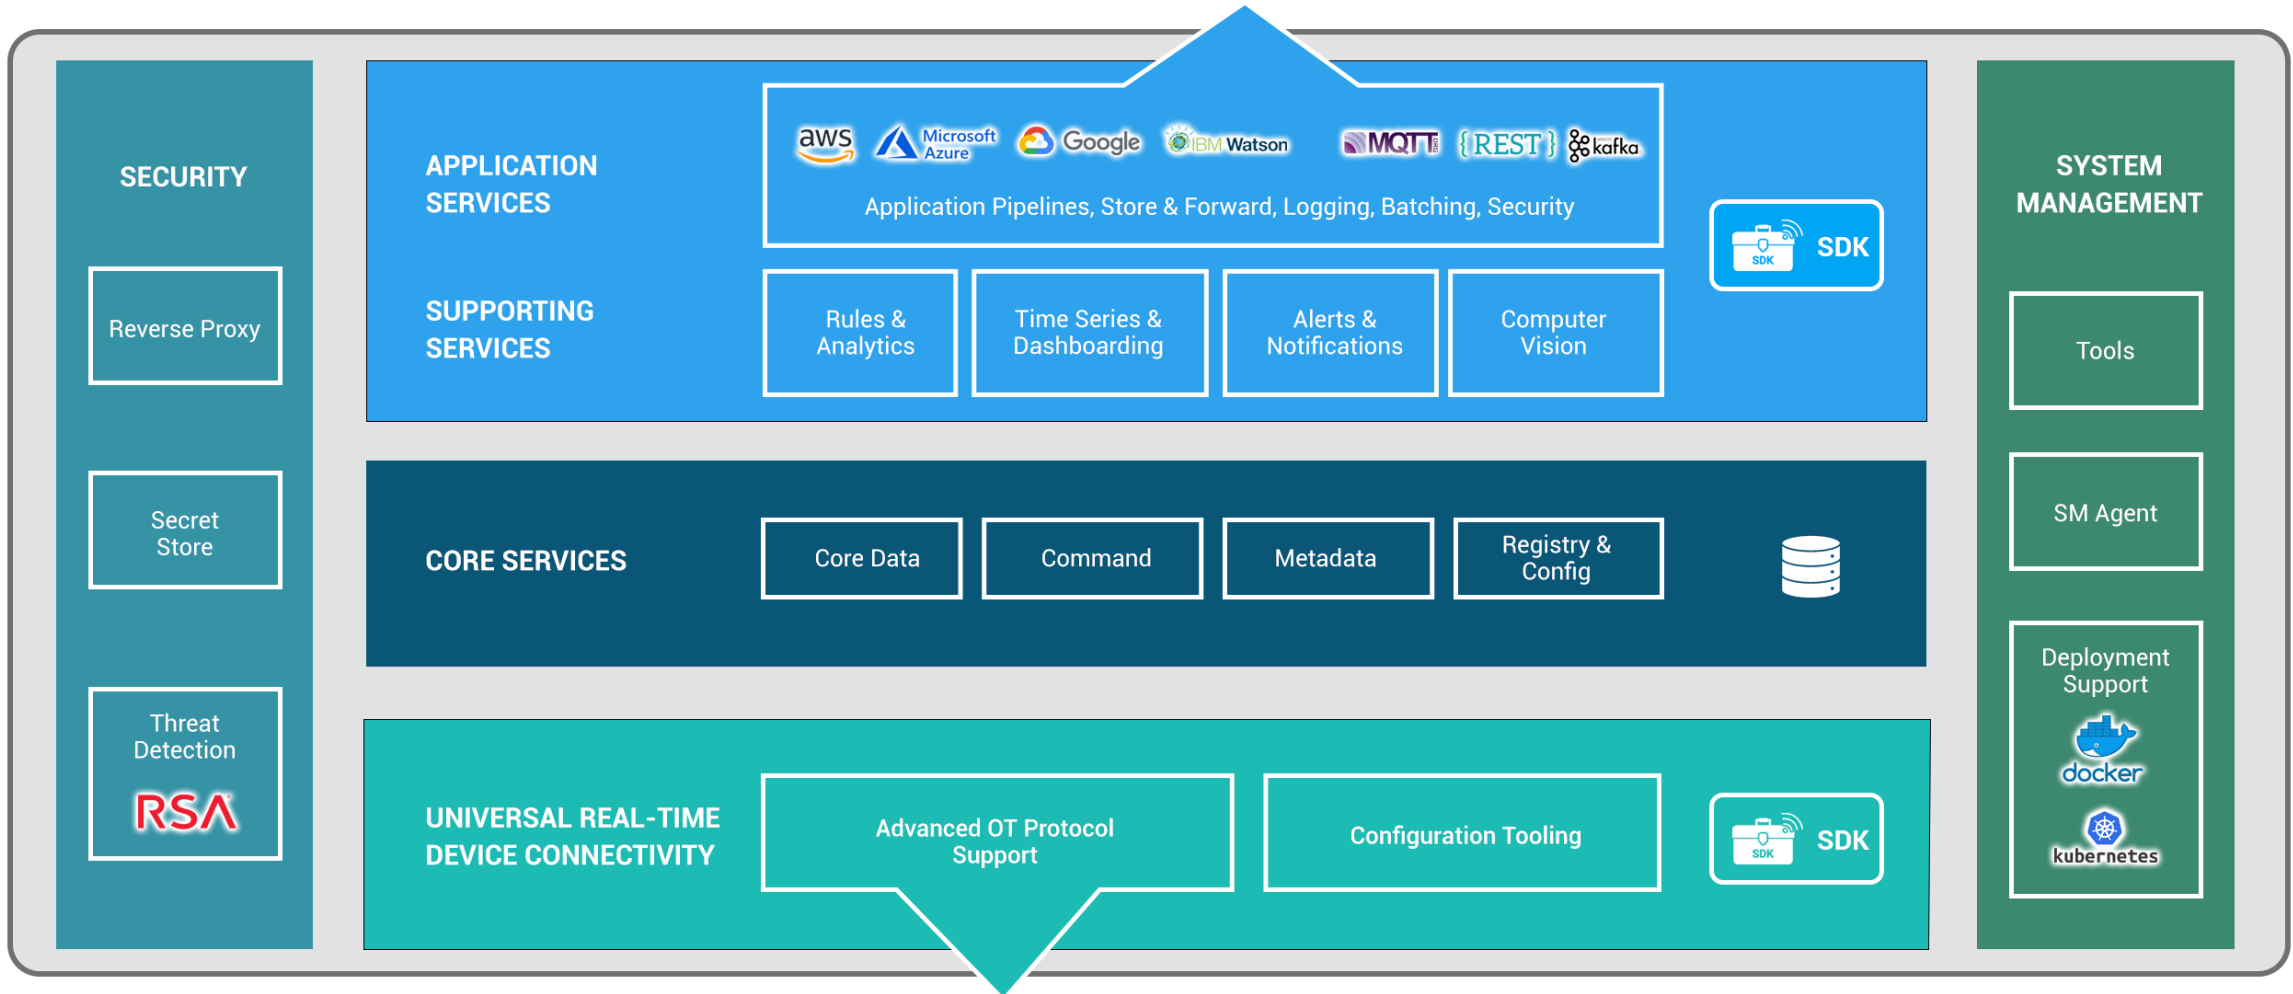

## Commercial Implementation of EdgeX Foundry

# Edge Xpert at a Glance

"Northbound" Cloud and IT Infrastructure

"Southbound" OT Devices, Sensors and Real-Time Control Systems

# Southbound Device Connectivity and Tooling

## Intelligent Device Connectivity for the IoT Edge

- Based on EdgeX Device Services but enhanced, productized and ruggedized for industrial use
  - Performance enhancements
  - Robust and deployment-ready
  - Many not available in community
- Advanced online tooling to create device profiles
  - Intuitive wizards that greatly simplify creating & editing profiles
  - **Free use for EdgeX users:**  
<https://dct.iotechsys.com>
  - Creation of open-source library of EdgeX device profiles

GPS

MEMS

2021 Roadmap

ØMQ

IOTech

# Cloud Connectivity

Easily integrate and share edge data to your choice of northbound Cloud & IT systems

- Based on EdgeX Application Services
- Enhanced for out-of-the-box use with extra App Service SDK functions
- Built-in support for authenticated streaming to the main cloud vendors, requiring just simple configuration:
  - AWS IoT Core
  - Microsoft Azure IoT Hub
  - Google Cloud IoT Core
  - IBM Watson IoT Platform
- Built-in support for MQTT, REST and Kafka, again requiring just simple configuration for use
- Filtering, Batching, Store and Forward, Security, etc

Google Cloud

IBM **Watson IoT**

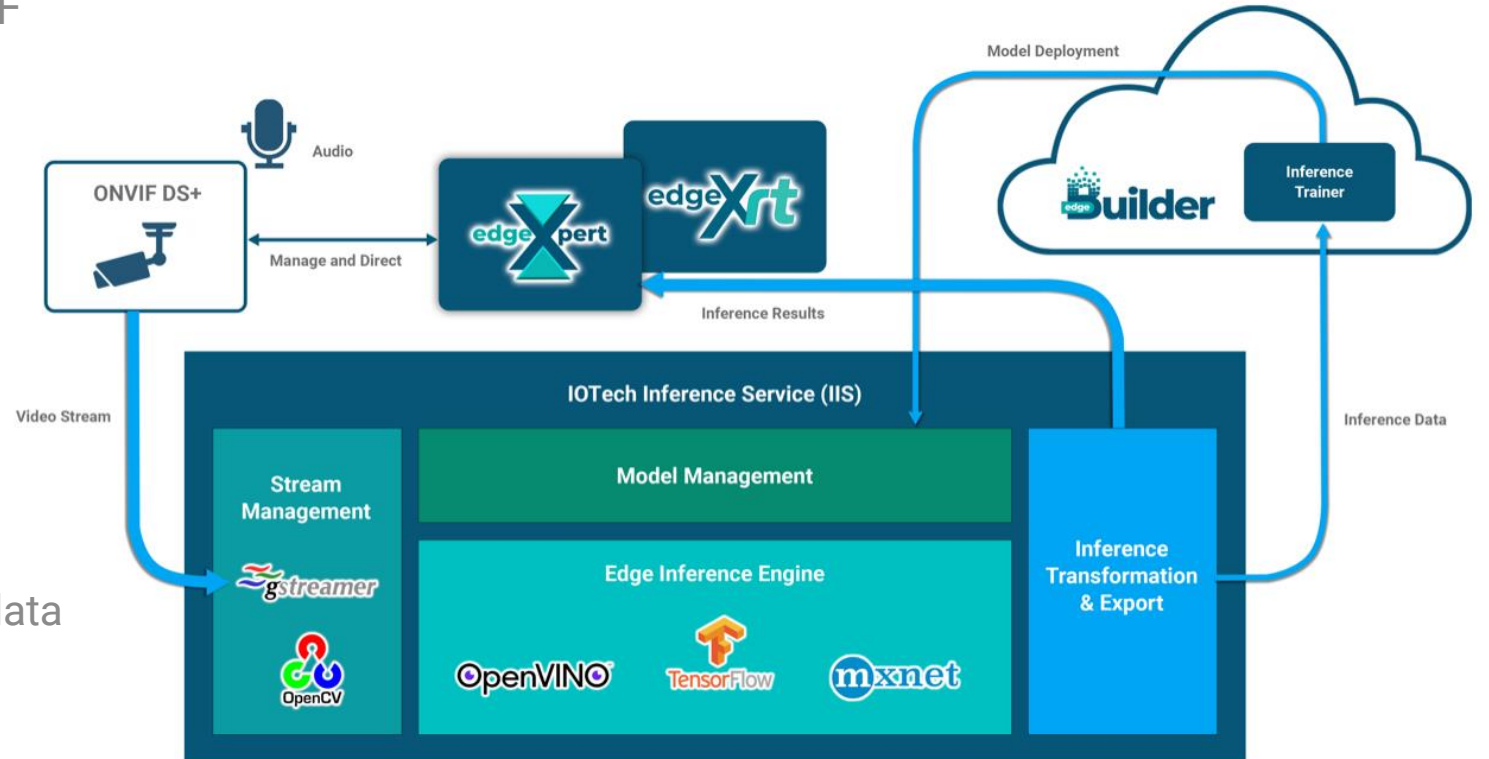

# Computer Vision Capability

## Major trend in customers deploying computer vision, AI and ML at the edge

- Camera Connectivity and Control: ONVIF
- Stream Management: GStreamer
- Vision Inference: OpenVINO
  - Inference results flow into Edge Xpert
  - Other engines to follow, e.g. TensorFlow
- Strong Partner Network
  - Intel, Hark (retail domain) and others
- Edge Data Fusion
  - Matching inference results with sensor data
- Edge Management
  - IOTech Edge Builder Product

# Why Edge Xpert?

## Edge Xpert Provides:

- Key value-add IP not available in the open source EdgeX Foundry
- Full commercial grade support for trusted deployment in business critical applications

## Business Benefits:

- Simplified Development Processes
- Faster Time To Market
- Reduced Risk
- Reduced Total Cost of Ownership

Category	Feature	EdgeX Foundry	Edge Xpert
Southbound Device Connectivity	Edge Device Connectivity	Partial	Full
	Industrial Control Connectivity	None	Full
	IP Camera Control	Partial	Full
	Device Configuration Tooling	None	Full
Edge Decision-Making and Control	Edge Rules	Partial	Full
	Edge Analytics	None	Full
	Time Series Data Storage	None	Full
	Dashboarding	None	Full
	Vision Inference	None	Full
Northbound Enterprise Connectivity	Application Functions SDK	Partial	Full
	REST and MQTT Support	Partial	Full
	Kafka Support	None	Full
	Cloud Vendor Integration	Partial	Full
Deployment-Ready Support	Productization and Usability	Partial	Full
	Tooling and Management	Partial	Full
	Security	Partial	Full
	Technical Support Guarantees	None	Full
	Consultancy, Pilots and Training	None	Full
	Accelerated Roadmap Options	None	Full

# The Time-Critical Edge

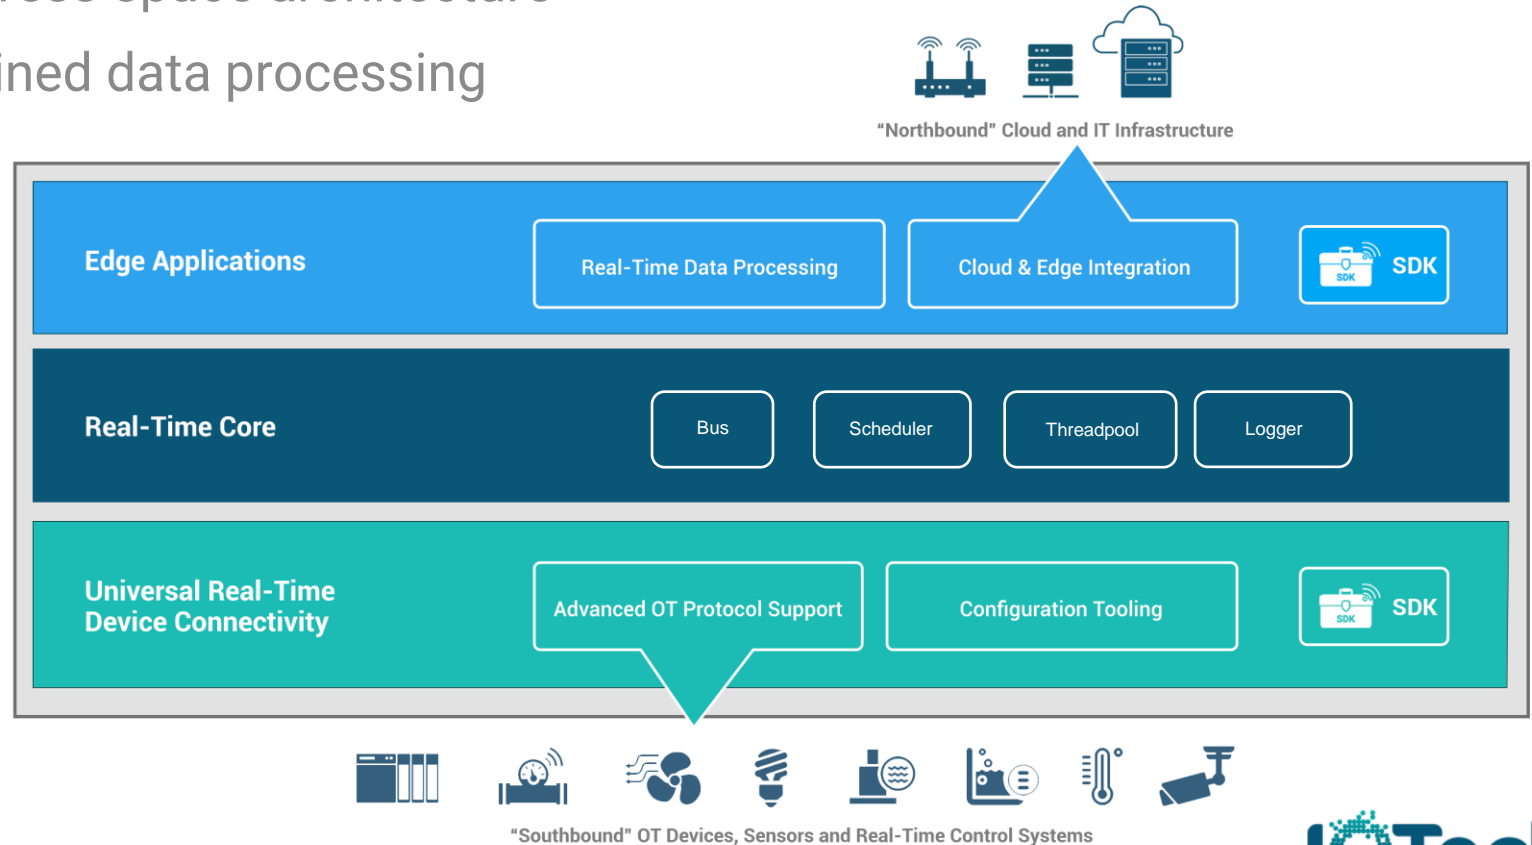

# Introducing Edge XRT

The first edge software platform designed specifically for the Time-Critical and Resource-constrained edge

- Complementary to Edge Xpert and EdgeX systems
- Implemented in C, single address space architecture
- Pluggable, dynamic, user defined data processing

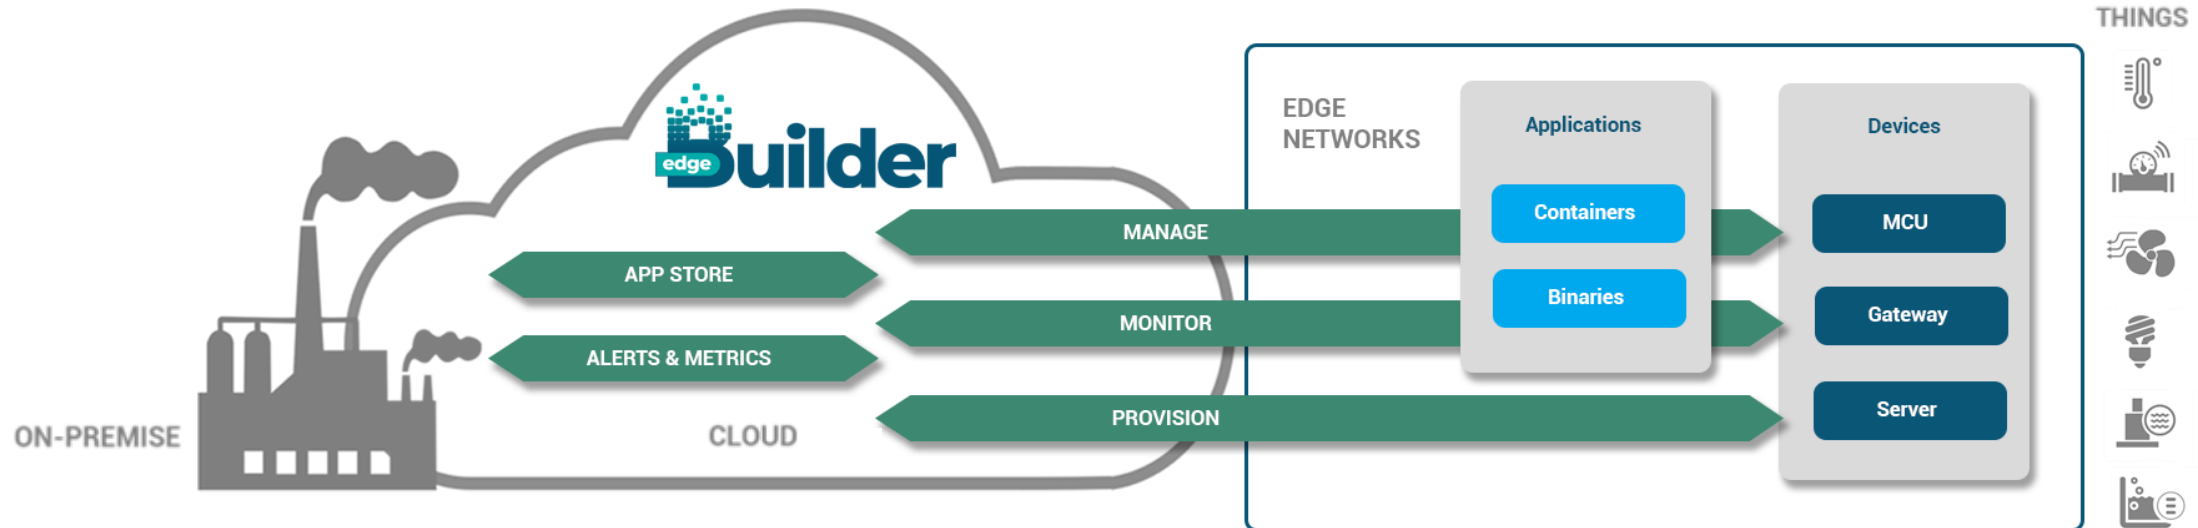

- Footprint < 100 KBs
- Latency < 100  $\mu$ Sec
- Real-time predictability
- Legacy portability

# Edge Management at Scale

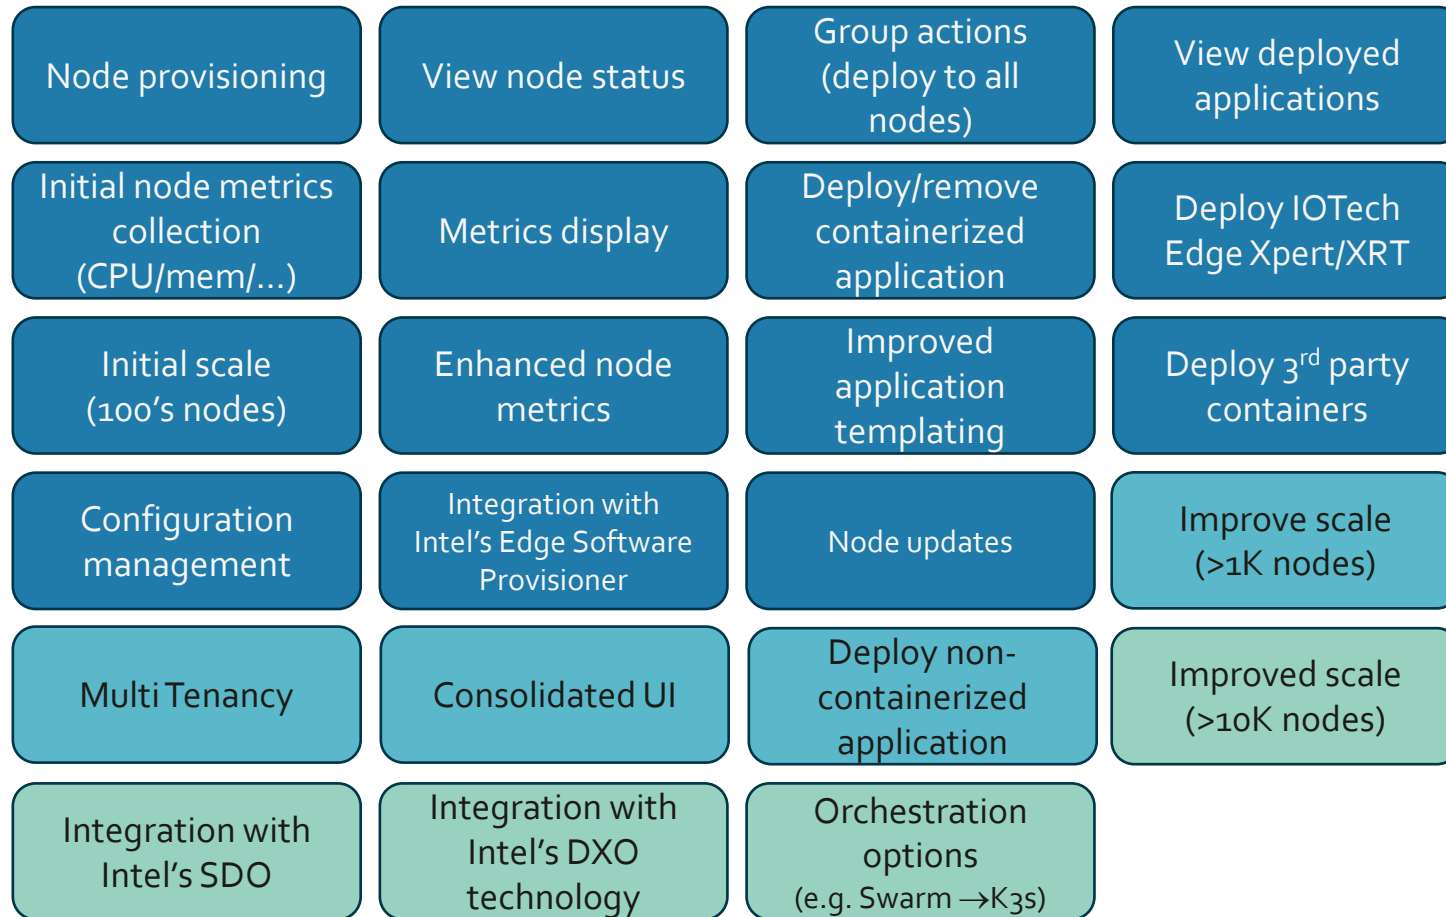

# Introducing Edge Builder

- **Designed by Edge Specialists**
- **Driven by Customer Requirements**
- **Independent of Edge Solution deployed**
- **Architected to support Cloud and On Prem**
- **Multi-Cloud Support**
- **Containerized & Non- Containerized Deployment**
- **Leverages Open Source**
  - Leverages Open Source for faster GTM and Openness

- **Manages any Applications**
  - Deployment & orchestration
  - Lifecycle management - start, stop & restart
  - Application monitoring
  - Data monitoring
  - Device/Sensor provisioning
- **Manages the Node**
  - Device onboarding
  - Install/update OS, firmware, infrastructure, certs install & update
  - Node monitoring

# Customer Use Cases

# Partner Solutions in Retail - HP

"SOUTHBOUND" DEVICES, SENSORS AND ACTUATORS

Extensive support\* for Sensor protocols / Connectors

## HP Engage Edge

Accelerate your Retail Solutions

### Ready-to-deploy

- Edge Gateway HW/SW Bundle (Intel certified RRK - "RFP-Ready-Kit")
- Designed for extensive IOT use cases in Retail/Hospitality
- World-class compute hardware choices – Intel 4<sup>th</sup>-8<sup>th</sup> generation
- Backed by HP's world class warranties/services

### Powerful, Compact yet ruggedized design

- For everyday retail environments
- Powered by Intel 8<sup>th</sup> Gen Core-i7 processor (& choices)
- Extensive on-board ports / connectivity options

### Ships with pre-loaded Edge Gateway Software

- Powered by HP ThinPro OS
- Linux Foundation EdgeX open framework
- Commercial Grade Support (SLAs)
- Extensive IoT Connectivity options
- Extend your use case recipes post-initial deployment

\*schedules being worked

# Partner Solutions in Energy - Accenture

## Remote monitoring of gas turbines across the distribution network

- The operator of one of the largest natural gas distribution networks needs to reliably and remotely monitor their systems with Edge IoT Technology
- **Business Challenge:**
  - Ensure gas is available 24/7 so its flow around the pipelines must be accurately monitored and controlled
  - The large compression tanks are driven and controlled by powerful turbines provided by different vendors
- **Why Edge Xpert was selected:**
  - Capability to monitor data from turbines provided by different vendors using different protocols
  - Cloud-agnostic and on-premise solution
  - Agile approach needed so flexible microservice architecture required
  - Open source basis key, but with SLA guarantees

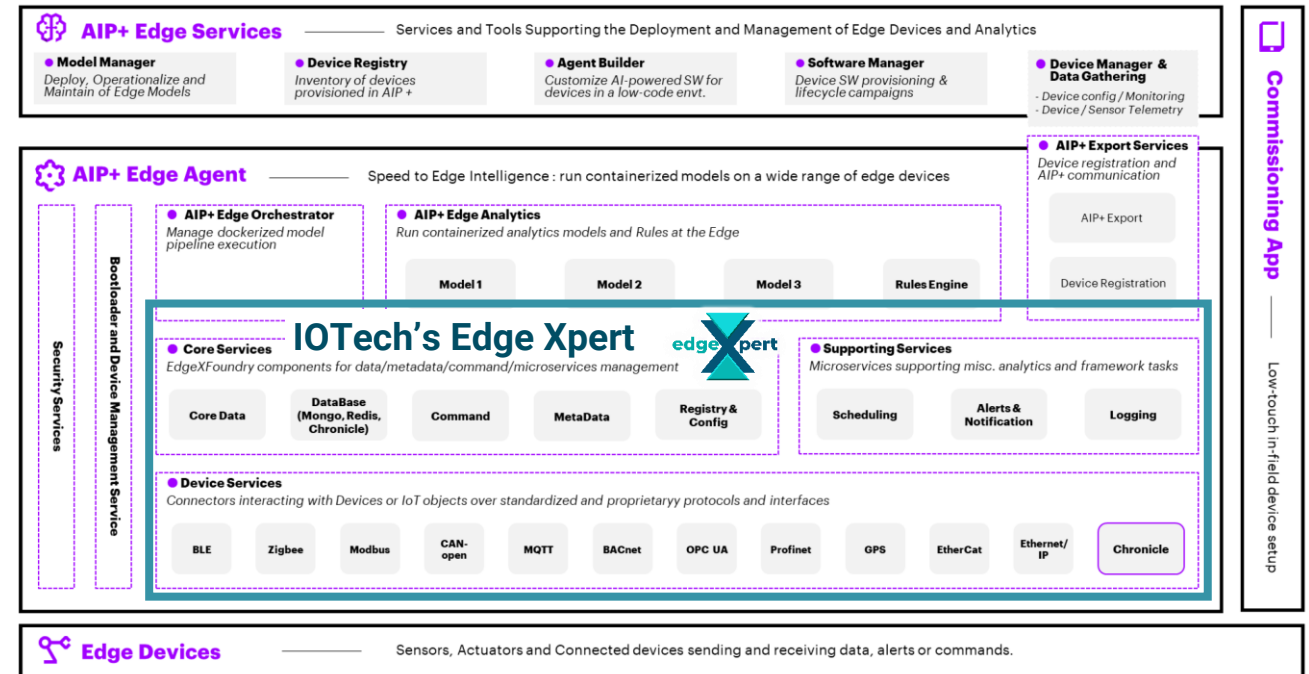

# Accenture & IOTech with AIP+

## AIP+ Applied Intelligence

### Accenture incorporates Edge Xpert in the AIP+ Edge Agent

- Accenture to benefit from a commercially supported EdgeX framework and IOTech's library of Device Protocol Implementations
- Edge Xpert integrated with Accenture's Edge IP
- Hear why Accenture chose EdgeX and IOTech <https://youtu.be/3k6RaBs93Ug>

Copyright © 2019 Accenture. All rights reserved.

“IOTech's solutions and deep device expertise will strengthen Accenture's own edge software and further help AIP+ to deliver new customer outcomes by combining edge processing with a wide range of device data sources”

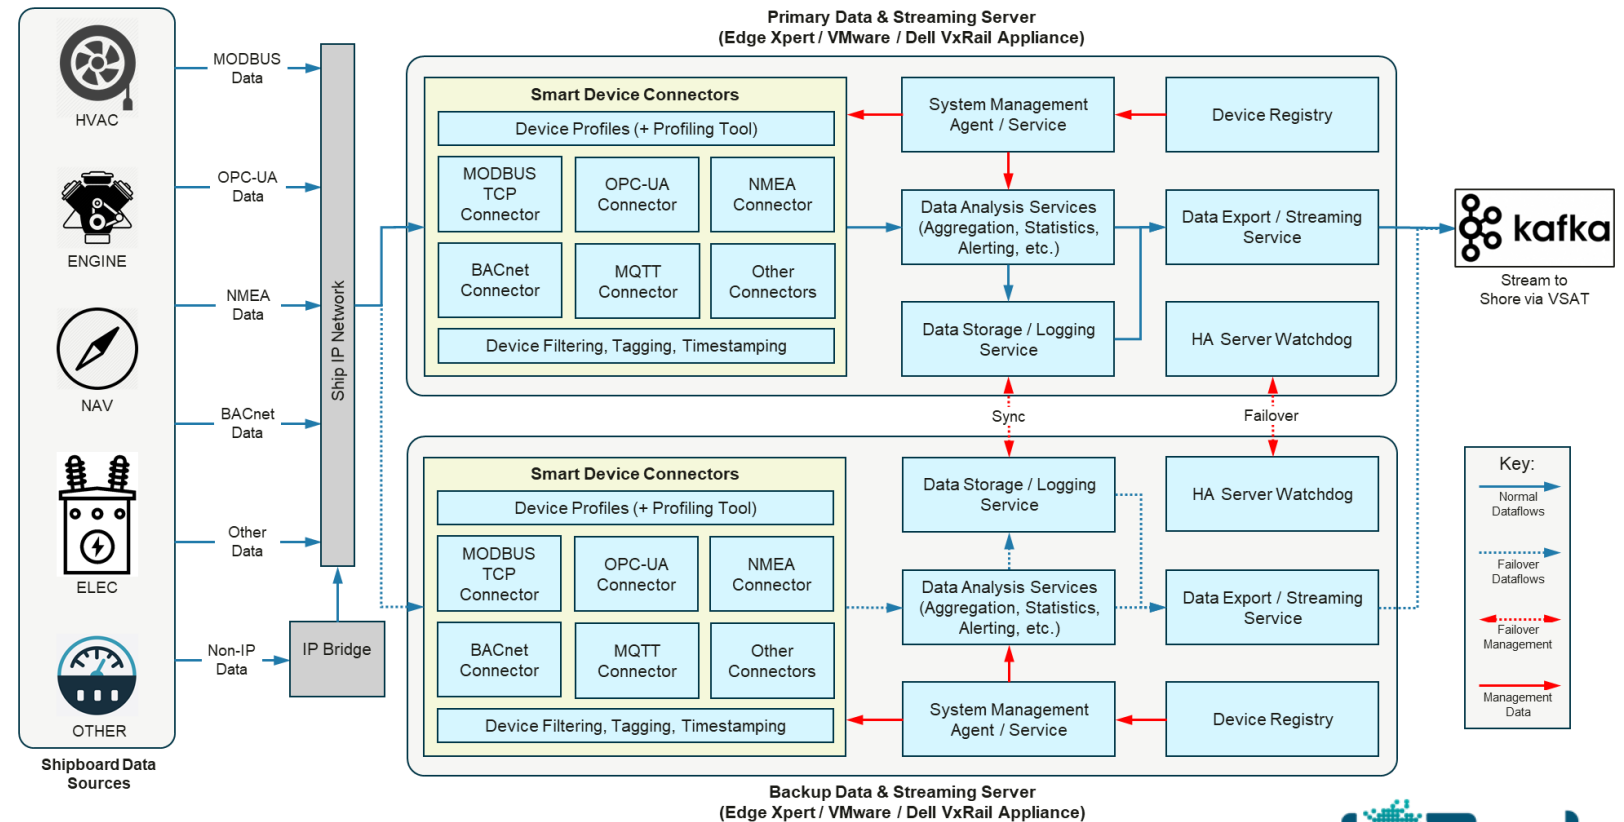

**Peter Utzschneider**, Managing Director, Accenture Platforms Product Management

# Partner Solutions in Transportation - Ship Borne Monitoring

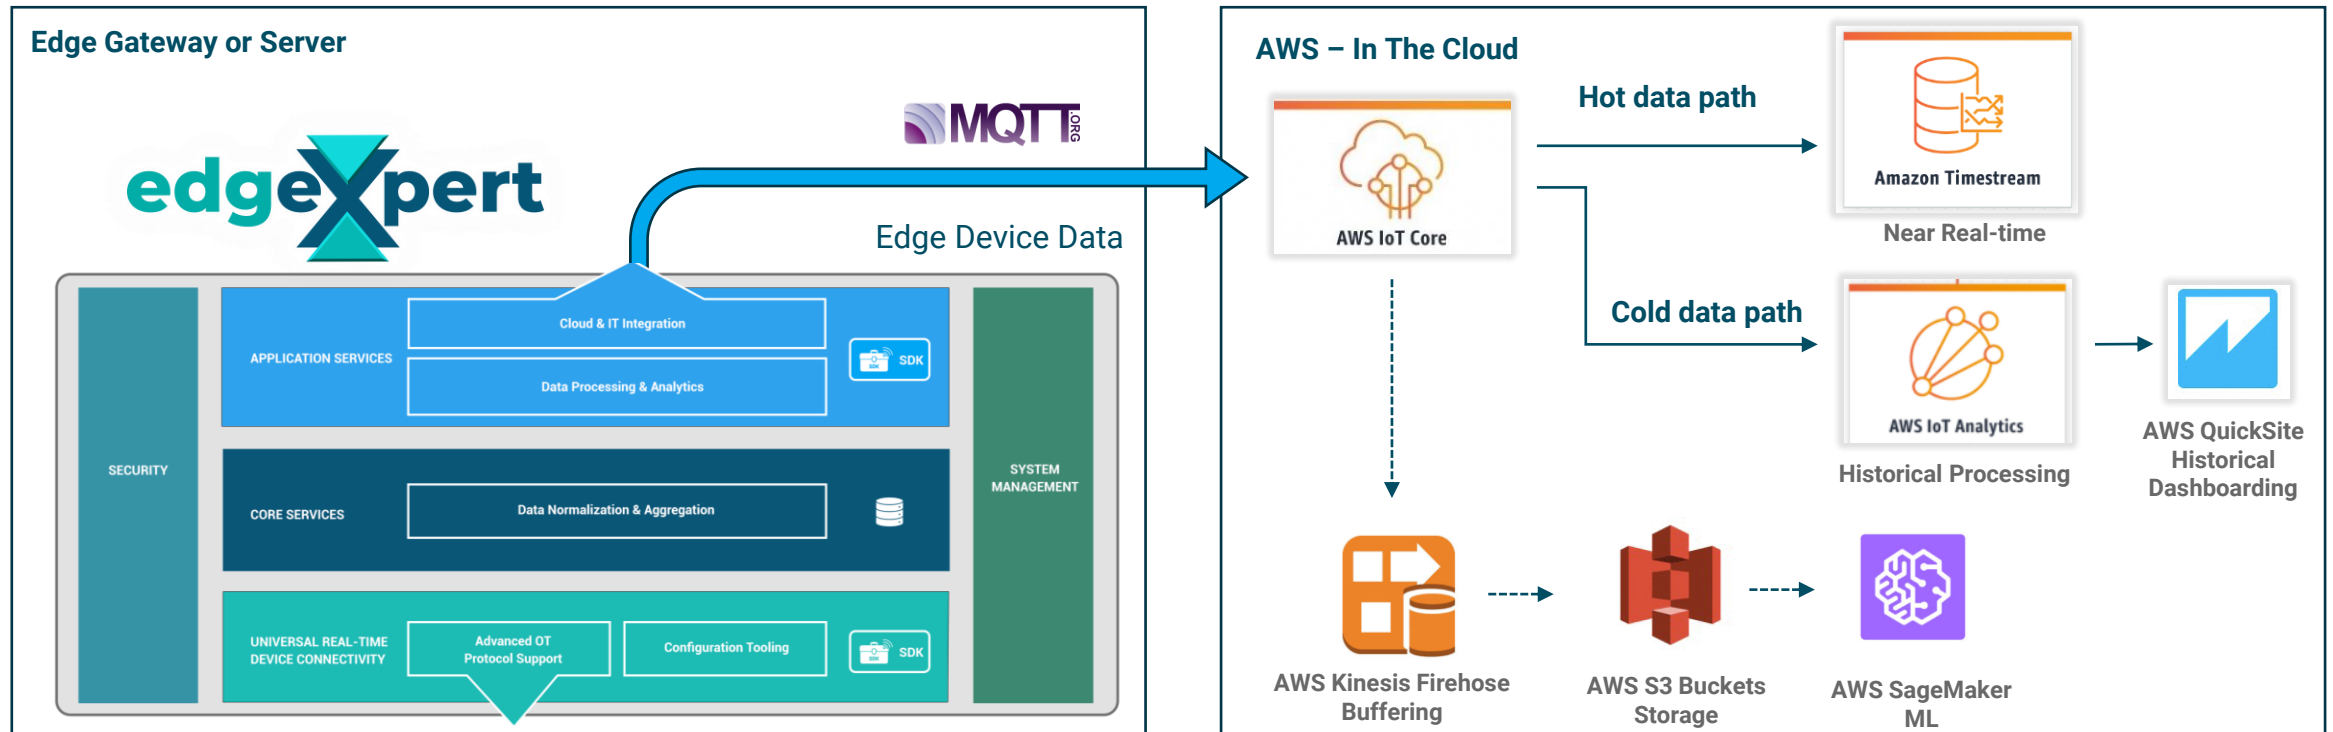

- Large European shipbuilding company
- Edge Xpert positioned as the Data Acquisition System (DAS) in the ship
- Pilot project with potential roll out to many ships
- Southbound: Modbus, OPC-UA, GPS, BACnet
- Northbound: Kafka – store and forward, failover solutions

# Partner Solutions in Hybrid Cloud – AWS and Google

- The cloud vendors represent major opportunities to IOTech
- No cloud vendors have complete IoT 'Thing' connectivity - none have a 'Time Critical' story, some have no edge products
- We are seeking to leverage AWS and Google partnerships, early days with Google but good progress with AWS...

# AWS Leveraging Edge Xpert - Demo

# EdgeX Futures

# EdgeX Futures

## Our thoughts on futures....

Features we believe are key from the EdgeX community going forward:

- Completion of the EdgeX V2 APIs in the Ireland release
- Completion of the messaging architecture within EdgeX
  - Device Service to Application Service message bus
  - This is key for more dynamic data flow and bi-direction Cloud comms
- Migration tools supporting V1.x to V2.x user upgrades
  - For example: device profiles and meta data
- EdgeX LTS (Jakarta release)? To help our own LTS and customer support plans
- Continued gathering of performance metrics
  - Especially scalability measurements (and improvements)
- Consideration of deployment concerns
  - Edge Xpert to be deployed on 1000s of nodes; advanced configuration can help

EDGE X FOUNDRY™

IOTech

# Summary

- IOTech has helped grow EdgeX to be the dominant Global Open Edge Platform
- We will continue to contribute, innovate and provide leadership in the EdgeX Foundry and LF Edge ecosystem
- Exciting new developments coming in 2021
  - Edge Xpert Video inferencing support
  - Major enhancements to our cloud connectivity (Bi-directional data flow)
  - Significant investment in usability
  - At the end of Q1 we will launch Edge Builder – Edge management at scale
  - We will soon launch our own on-line store
  - Major customer win announcements soon with XRT!!
- We're looking forward to working with you all in 2021 (hopefully face to face!!!)

**Q&A**

**Thank You**
