

Summary / highlights from the TSC Meeting 1/7/21

- **EdgeX will have a Dot (1.3.1) release to be coordinated in the next week and likely to be released in early Feb.** The dot release will include:
 - Metadata update of admin/op status and callback (<https://github.com/edgexfoundry/edgex-go/pull/2881> & <https://github.com/edgexfoundry/device-sdk-go/pull/652>)
 - ZMQ update to fix loss of messages due to system interrupts
 - CLI update to address missing configuration file
 - Device Services will release the GO SDK this week (v 1.4.0). We may have additional SDK, DS and App Services as part of this release depending on what all gets included.
- Secret provider for all work and message bus implementation is going to put a lot of work on the C impl side of Device services. We may have to prioritize (Iain to pick this topic up next week in the DS WG).
- Logging service drop and Mongo support removal is almost complete.
- Removal of Marked to Push is done (or at least PR is submitted).
- App services multiple subscriptions is done (or at least a PR is submitted).
- **App service WG meeting is now at 3:30 MST.**
- QA old blackbox tests have now been completely stopped (in favor of the new TAF tests).
- A new Hanoi performance report has been completed. IOTech will create a nice report and make that available soon.
- Dockerfile clean up (Alpine consistency, etc.) work is done.
- **Docker image naming changes is in progress.**
 - Compose file changes (night build) and TAF tests will have to be modified accordingly.
 - When the name changes do occur, notification to the community will be put out by Slack and email forum.
- GitHub Discussions may be a replacement for Slack. TSC members are encouraged to take a look.
 - Mattermost discussions with LF are still ongoing.
 - GitHub discussions would be per repository.
- EdgeX Ready program is still working hard to roll out early in 2021.
 - Resolving terms and conditions and wording on the Wiki
 - Working on the profile tool rollout with IOTech.
 - **The profile tool to be demo'ed at the next TSC in 2021. (Jim/James to setup)**
- The next Adopter Series event will be Jan 19th – by IOTech
- Hanoi release press release when out and website updated. Please promote and retweet!
- Web site analytics were reviewed in Marketing meeting and will be reviewed monthly (not much to glean from December numbers)
- **Top Coder meeting for next steps is happening on Friday at 8am MST.**
- V2 API work is about ½ the way done.
- **Kubernetes deployment file and example were completed thanks to VMWare team efforts. Need to tackle security services next.**
- **Anyone with marketing or other expenditures for 2021 are asked to provide input to Marketing group by Jan 18th meeting. We have \$10K discretionary to spend and we want to plan that**

during the next marketing meeting (right now it is ear marked for Web site work, China translation, and possibly some UX work).

- EdgeX Day in the PRC just before Christmas was a huge hit - > 12K attendees and/or downloads of the video stream.
- WG leads are asked to provide Jim with inclusive language issues by Jan 15th meeting.
- ADR's that have been approved:
 - Secret Provider for all #281
- ADR's currently under review:
 - Metris / #268
 - DS Filters / #282
 - Update release ADR / #301
 - Upload threat model / #259
 - Update DS Rest API / #247
- A new China/PRC TSC meeting will begin monthly after Chinese New Year (Jim/Melvin/Gavin coordinating). Seeking TSC members to volunteer to come to a once-a-month meeting (on a rotation basis).
