- Wait for DevOps alpine upgrade.

- Review action items from previous week

## Agenda

- Secrets retry loop impacts device callbacks:  
  - Suspected bug: deadlock between waiting for device secret and responding to add device callback. Need to respond back to core-metadata before starting the secrets loop. Move this bug to camera device service.

## Action Items

- 7/14: Bryon: Update security policy documentation w.r.t. when to use GitHub security advisories to notify users of issues.
- 8/25: Jim/Tony: Report back progress on Consul security after-the-fact disable. (Look at a snap configure hook to see if it will work to modify ACL config.)
- 9/1: Test the VaultTTL enhancement. Works!
- 8/25: Bryon: Add issue to Jakarta documentation board to document new Vault TTL setting.
