

EdgeX Security WG Meeting

<https://wiki.edgexfoundry.org/display/FA/Security+Working+Group>

February 15, 2023

Attendees

Agenda

Updates

- Microservice token-based auth ADR out for TSC review
<https://github.com/edgexfoundry/edgex-docs/pull/659>
- Discussion / questions on ADR
- Jim Wang on SPDX SBOM

- See if we can get license information into the SBOM, if so, eliminate Attribution.txt. Would add SBOM generation to release checklist. Can generate sbom at any time.
- If can't get license info in, leave attribution.txt alone and generate SBOM at release time.
- Need to generate sbom for inclusion in docker containers (dynamically generated artifact).
- Commit new SBOM to repo at release time w/changelog updates. (Will be stale until someone runs make sbom and commits it).

Opens

-

Standing Agenda

- [Review Security Board](#)
- [Review CIS docker scan](#) (will skip unless something changes) (click latest run, go to classic, view console output).
 - Last checked: August 3, 2022 – as expected
- [Review Snyk \(Jenkins\)](#) (will skip unless something changes) ([Imagelist](#))
- Review action items from previous week

Action Items

- 7/14/21: Bryon: Update security policy documentation w.r.t. when to use GitHub security advisories to notify users of issues.
