1.) Update on a few items from last week

a. Blacklist demo using Kuiper

i. Initial diagrams published to wiki @ Core WG page

1. <https://wiki.edgexfoundry.org/display/FA/Core+Working+Group>

ii. Trevor still has deliverable for ADR to follow.

iii. Misc questions

1. Should we implement a default blacklist handler function in AppFunc SDK?
2. Does DS SDK provide a blacklisted device cache?

iv. *Discussion boiled down to whether or not automatic removal of the device if it's in the blacklist is included in the notion of "dynamic discovery"*

1. *Tony: No*
2. *Trevor: Yes*
3. *Deferring discussion to Monday's pre-wire meeting*

b. Config-seed removal and Java rules-engine

- i. Jim audited the configuration files in repo compared to config-seed/properties files.

- ii. Issue tracking recommended fixes <https://github.com/edgexfoundry/support-rulesengine/issues/68>
 - c. Configuration changes
 - i. Service key changes per edgex-go PR #2401 were rolled back.
- 2.) Config-seed ADR review
 - a. <https://github.com/edgexfoundry/edgex-docs/pull/103>
 - b. Any discussion items from the PR review we need to bring to the group?
 - c. Next steps to bring to closure.
- 3.) Error Handling Improvement Suggestions
 - a. <https://github.com/edgexfoundry/edgex-go/issues/2403>
 - b. Timing for incorporating suggestions? V1 or V2?
 - i. Trevor's preference is V2
