

## Core Working Group Agenda (1-Aug-2019)

Attendees:

### Old Business

- General concerns about containerized bootstrapping
  - Reasons for 1.0.1 release
  - Greater complexity and timing needs w/security enabled
  - *Related to coordinating service timings*
    - *Discussed proposal related to storing a semaphore file on FS – mapped volume (docker) or local (Snap, native)*
  - *Punting until next week*
    - *How are other platforms solving this problem?*
    - *Define if we need different solutions for HA versus non deployments*
- Update on Value Descriptor responsibility shift
  - PR 1557 merged – core service functionality
  - Disabled by default, setting in configuration.toml
  - Follow-up PR #1603 to address some issues
    - Waiting for Anthony to return from vacation
- Consul API import

### New Business

- Discussion of querystring support for commands
  - <https://github.com/edgexfoundry/edgex-go/issues/1564>
  - <https://github.com/edgexfoundry/edgex-go/pull/1571> (Example PR)
- Geneva as v2.0.0
  - What does this mean for our API URLs?
  - Need to determine scope – Does it touch the whole API or just specific endpoints?
  - We do have cross-cutting enhancements that could revise the whole thing
    - Like Request/Response objects
  - Thoughts from other application teams (DS, App) on integration
- Any open items??
