

## **Core Working Group Agenda (17-Oct-2019)**

Attendees:

### **Old Business**

- Go.sum (Andre brought this up in #core)
  - <https://github.com/edgexfoundry/edgex-go/issues/1487>
  - Result of Lenny / Trevor's comparison
    - Trevor sent go.sum created via 1.13 built to Lenny to see if 1.12 build would work. It did not.
    - This indicates including go.sum in the repo among developers with different versions of Go could break the build (CI uses 1.12)
    - Due to other activities, have not followed up with wider Go community (other sizable projects) on this question
  - Conclusion – For now, we're leaving it out.
- Status update on Security Integration
  - Any discussion items – Anthony, Diana or Tingyu?

### **New Business**

- All major Fuji deliverables have landed
  - Focusing on testing/stability for the next week
- Upcoming meetings
  - 10/24 – Trevor on vacation
  - 10/31 – Trevor on a plane back from France
  - 11/07 – Geneva F2F (will surely cancel this one)
  - 11/14 – Trevor on a plane back from San Francisco
  - What should we do about this schedule?
    - Does anyone want to serve as my second to facilitate?
- Any new business?
