

## **Core Working Group Agenda (25-Jul-2019)**

Attendees:

### **Old Business**

- Update on Consul v1.5.2 rollback
  - Made contact with Hashicorp support. Asking us to file an issue.
  - Thanks to Tony Espy for making the contact.
- Continue “init mongo” script replacement discussion
  - Review notes and possible diagram collected from Security WG call (24-Jul-2019)
- Continue on service configuration initialization thought experiment
  - How does this align with the secrets initialization above?
- General concerns about containerized bootstrapping
  - Reasons for 1.0.1 release
  - Greater complexity and timing needs w/security enabled

### **New Business**

- Update on Value Descriptor responsibility shift
  - Communicate coordination with Device Services
  - Need someone to take on the work of adding /version endpoint
- Any open items??
