Core Working Group Agenda (26-Sept-2019)

Attendees:

Old Business

- Go 1.13? Anyone used it? Thoughts?
  - *I'm using it now. So far, no issues.*
  - *It does write "go 1.13" at the bottom of the go.mod*
    - *Indicates a minimum supported Go version. We'd want this to be "go 1.12"*
    - https://github.com/edgexfoundry/edgex-go/issues/1826
    - *Go 1.13 builds and runs the services fine if I edit to "go 1.12"*
- Geneva Proposed Items
  - https://wiki.edgexfoundry.org/display/FA/Geneva+Planning+Items
  - Any additions?
    - *I added wish list item for alternate messaging bus support (such as NATS)*

New Business

- Discuss command-line flag consistency (core, device, app functions)
  - Question regarding service overrides when env var mechanism already exists.
  - Backward compatibility if changes occur
  - https://github.com/edgexfoundry/edgex-go/issues/1822
  - See supporting doc on wiki under this meeting
    - https://wiki.edgexfoundry.org/display/FA/Core+Working+Group
- Any new business?
