Old Business

- Service Initialization Code De-duplication Proposal (Michael Estrin)
 - <https://github.com/edgexfoundry/edgex-go/pull/1751>
 - Ask from the community last week for a follow-up session after a review period.
 - What questions do folks have?
 - *Is the pattern Michael has provided applicable to the SDKs?*
 - *Are pieces of it / techniques transferrable?*
 - *Geneva proposal*
 - *Sequencing for Fuji*
 - *Core-data first service integrate pattern*
 - *Need to utilize go-mod-secrets*
 - *Outstanding PR review (Michael/Anthony)*
 - *Will work together for initial integration*

New Business

- Go 1.13? Anyone used it? Thoughts?
 - *Sentiment seems to be hold off unless Fuji relies on a language feature.*
- Geneva Proposed Items
 - <https://wiki.edgexfoundry.org/display/FA/Geneva+Planning+Items>
 - Any additions?
- Any new business?
