Core Working Group Meeting Notes (27-Sept-2018)

Attendees:

Participants (15)

- Trevor Conn (Host, me)
- Rodney Hess
- Alberto
- Bruce Huang
- Cloud Tsai
- Drasko - Mainflux
- Emad Attia (Intel)
- Eric Cotter
- Felix Ting
- Joan Duran
- lgoodell
- Michael Hal – LF
- Mike Millsap (Intel)
- Tommy Trimeloni (Intel)
- tonyespy

Mute All   Unmute All   More ∨

Old Business

- Config-seed awareness of device services
  - Two proposed approaches

- - Pull configuration from specified path or network location during Snap/Docker assembly
    - Do same except at runtime
  - CBOR / Intel POC
    - Has everyone who's interested had time to review the discussion from last week?

New Business

- Redis
  - Andre Srinivasan to provide progress update / demo
- NodeRed
  - Came up during TSC call in context of RulesEngine replacement
  - Sounds like IOTech is using this in-house
    - Need more details RE: how this applies to RulesEngine
  - *Need more information on this and how it's applicable to the project*
