Agenda

• TAF Status

 $\frac{#308}{8}$ & $\frac{#267}{2}$ - these are now merged. Expect the TAF tests to pass tomorrow, will keep an eye on them

- Functional tests: 545 59 failure on security, 60 failure on non-security
- Integration tests: 43 36 failure
- Performance tests: 10 1 failure
- Triage and Notable Tickets
 - Core
 - <u>#3909</u> Lenny: this is a breaking chance so the fix needs to just do a log and continue
 - <u>#3899</u> This is actually for all APIs, but seems to be as per the design. Some more investigation needed. Farshid to comment on ticket.
 - QA
 - <u>#594</u> James: Don't think IOTech has available resources to test this. Need more info from Bryon Nevis as to what is needed
- ADRs
 - Dynamic Device Profiles Implementation underway @Ginny #710
 - Metrics Implementation underway @Lenny Draft PR: <u>#709</u>
 - **UoM** Now TSC approved. Any chance of Kamakura implementation? We think not
 - Addition of North-South Message Bus #656
 - More discussion today? Deferred to next week. Can people please re-read and provide more comment

(plus QA/Test, System Management and UI)

Ticket Status

- Core WG <u>Project Board</u>
 - go-mod-core-contracts
 - New issues
 - <u>#710</u> Add API routes for device profile changes
 - <u>#707</u> Update the ReadWrite validation of
 - ResourceProperties/DeviceCommand DTOs
 - <u>#705</u> Create new Metric DTO for the new Service metrics data
 - Fixed issues
 - <u>#703</u> Extend DeviceServiceCallbackClient to support device validation API
 - go-mod-messaging
 - In progress issues
 - <u>#133</u> BUG: Redis implementation has concurrency issue is subscribed to to same topic multiple times
 - go-mod-bootstrap
 - New issues
 - <u>#307</u> Create a new common Metrics Manager
 - Fixed issues
 - <u>#308</u> Correct pre-release tag
 - edgex-go
 - New issues
 - <u>#3899</u> core-metadata v2 /device/name/Camera001 with trailing slash got 404
 - <u>#3901</u> Create new Core Data metric for Events received
 - <u>#3909</u> Log and ignore the validation error if the Device Service is not running when creating and updating Device
 - In progress issues
 - <u>#3612</u> Utilize MaxRequestSize configuration in each microservice
 - <u>#3860</u> "redisdb" secret incorrectly states username is "redis5"
 - Fixed issues
 - <u>#3237</u> feat(data): Make MaxEventSize a service configuration setting
 - <u>#3906</u> device-virtual doesn't produce readings since v2.2.0-dev.35
 - <u>#3872</u> Notification bug
 - <u>#3902</u> Move the core-data subscriber.go to the correct package
 - <u>#3894</u> Call validation API before calling back to device service
- QA/Test Issues Project Board
 - \circ edgex-taf
 - New issues
 - <u>#594</u> Regression test needed for delayed-start service ADR
 - Fixed issues
 - <u>#591</u> App service with mqtt export and security enabled can't connect to mqtt broker sometimes
