

26th May 2022

Attendees

- James Butcher (IOTech)
- Iain Anderson (IOTech)
- Lenny Goodell (Intel)
- Jim Wang (Intel)
- Jim White (IOTech)
- Rodney Hess (Beechwoods)

Agenda

- TAF Status
 - Functional tests: 594 - all passing
 - Integration tests: 47 - all passing
 - Performance tests: 10 - all passing
- Levski Cycle Planning
 - Agree plan/priority/timelines/resources to complete Levski tasks (tasks below)
- Any Other Business

Levski Tasks:

- Upgrade Go to 1.18
 - DevOps related
 - SmokeTest first. Work with Cloud and team for this. Action: James work with Cloud
 - No desire to begin using generics just yet. Suggest opportunistic use when needed
- North-South Message Bus Implementation (large). Jim to plan suggested task items ahead of Core WG meeting on June 9th
- Additional Metrics (size dependent on what)
 - What for Core WG? Core Data has some done. James to plan on meeting 9th June to agree details for Core
- CPE (System Events) ADR (small) - Lenny to own this. Use new requirements template when available
 - CPE Implementation
- UoM Implementation (small/medium). Work should be limited to Metadata service
- Core Data Cache ADR (small) (Eaton)
- Parent/Child Relationships ADR (Eaton)
- Testing
 - Delayed Start in TAF Melody from IOTech may be able to implement this
 - CBOR vs JSON low priority
 - Real Hardware Move this activity to Device Services group, if any

Ticket Status

- Core WG [Project Board](#)
 - go-mod-messaging
 - Fixed issues
 - [#52](#) MQTT Implementation doesn't handle different Pub/Sub hosts
 - go-mod-core-contracts
 - In Progress Issues
