

# EdgeX Foundry Core Working Group

(plus QA/Test, System Management and UI)

31 January 2023

## ATTENDEES

 Participants (5)

 Cloud Tsai (IOTech) (Host, me)

 Lenny - Intel

 Jim Wang (Intel)

 Jim White

 marc-philippe fuller

## AGENDA

### TAF Status

- Functional tests: **All failed tests are blocked by [edgex-compose PR #328](#)**
  - Non-Security **589** tests - **all failed**
  - Security **590** tests - **all failed**
- Integration tests: **All failed tests are blocked by [edgex-compose PR #328](#)**
  - Non-Security **121** tests - **all failed**
  - Security **124** tests - **all failed**
- Performance tests: **All failed tests are blocked by [edgex-compose PR #328](#)**
  - Non-Security **10** tests - **all failed**
  - Security **10** tests - **all failed**

### QA Progress

- Keep tracking the impact of breaking changes and adjusting the test scripts

## Core Progress

- Common configuration feature is under development
- Implementing Device Service, Profile, and Provision Watcher System Events

## Any Other Business

- Removal of UseMessageBus and PostDeviceChanges configs
- Resolution of <https://github.com/edgexfoundry/go-mod-messaging/issues/166>

## Core /QA WG [\[Project Board\]](#)

## Common Config [\[Project Board\]](#)

## NOTES

- Disable smoke test in edgex-compose for now, and resume the tests after we have stabilized coded. We will track the failed test cases through the daily tests before that.
