

24th Feb 2022

Attendees

Others may have joined after the attendees were captured at the start of the meeting.

Agenda

- TAF Status
 - 545 Functional tests - all passing
 - 43 Integration tests - all passing
 - 10 Performance tests - all passing
- Notable Tickets
 - Redis concurrency bug [#133](#)
 - Lenny did some background testing with MQTT
 - MQTT ignores the second subscription
 - Redis - potentially take the same tack; ignore any additional subscriptions
 - Accepting version update: Cobra from 0.0.7 to 1.3.0 [#430](#) - will merge
 - Update on Farshid's investigation? [#3849](#) - no time yet, keep on list
 - Topic for upcoming semi-annual planning meeting: what do we want to support from an OS/arch perspective and artifacts going forward.
 - Do we need to better document what we support and where
 - Getting started - better info there?
 - Redundant version files in branches [#680](#) - Farshid to add to docs
 - Done and merged! Thanks Farshid
 - Device Profile ADR - implementation next up; status?
- ADRs
 - Metrics - now ready for vote
 - Jim to update based on comments from the meeting regarding Prometheus and C library
 - UoM [#694](#)
 - Jim to make a couple of small revisions based on comments from the meeting.
 - Addition of North-South Message Bus [#656](#)

- Only initially discussed because of time. Jim to open a section to get review comments on status code and redundancy of request id.

- Jakarta Known Bugs
 - <https://wiki.edgexfoundry.org/display/FA/Jakarta#Jakarta-KnownBugs>
 - Jakarta Issues Project: <https://github.com/orgs/edgexfoundry/projects/47>

Ticket Status

- Core WG [Project Board](#)
 - go-mod-messaging
 - In Progress issues
 - [#133](#) BUG: Redis implementation has concurrency issue is subscribed to to same topic multiple times
 - Fixed issues
 - [#130](#) Concurrency bug in redis client subscriber
 - edgex-docs
 - Fixed issues
 - [#680](#) Redundant version files in branches override the production versions
 - edgex-go
 - In Progress issues
 - [#3849](#) Images in the edgexfoundry dockerhub support multiarch
 - Fixed issues
 - [#3874](#) Location of client service obtained from the registry
 - [#3884](#) Core Command GET/PUT /device/name/{name}/{command} returns 500
- QA/Test Issues
 - edgex-taf
 - New issues
 - [#575](#) Update StoreAndForward005 to fix retry log not found
