

# EdgeX Application Working Group 6/28/2019

## Topics for today:

- Dynamic Func Pipeline Updates
  - Profile for different versions
- Rules Engine Issue - Handling envelope from App Function SDK/Core Data
  - Jim to update Rules Engine - Minor Version Update to Rule Engine
  - Will handle both from Core Data (wrapped w/ Envelope) directly and from Export Services (unwrapped)
- CI/CD Pipeline updated using what Lisa demoed in DevOps working group
  -
- Repo created for “app-service-configurable” service in EdgeX-Holding

Any Bugs needing to be discussed?

Any Other Updates?
