

26 June 2023

ATTENDEES

AGENDA

- CSDK catchup on features
 - Support common configuration
 - Support NATS messagebus (stretch)
 - Support upload of provision watchers to core-metadata from files
- URIs for files
 - https://github.com/edgexfoundry/edgex-docs/blob/main/docs_src/design/adr/0027-URIs%20for%20Files.md
 - New issue opened for Go sdk: [#1467](#)

- Update device-uart to v3.0 and release(follow with HCI)
 - Issues in progress: [#9](#), [#10](#)
 - Lindsey to follow up with HCI
- Inter-device relationships (affects both core and devices - Eaton)
 - Lindsey to follow up with Tom
- Implement LastConnected metrics
 - Implement as a counter for each device - this contains a timestamp
 - Provide a rest endpoint for reading the LastConnected for a named device
 - Lenny will open an issue to address the requirement
- Go through icebox
 - [#358](#) move to Release Backlog for further investigation

Progress

- EdgeX C SDK file metadata.c function `edgex_metadata_client_add_or_modify_device()` unable to update existing device [#452](#)
 - Felix to add a note on the Minnesota release wiki page

Other Business

Device WG [\[Project Board\]](#)
