Device and Device SDK Working Group

Notes for October 12 2020

Issues

- device-sdk-go #529 (v2 REST API) – final PRs in review
- device-sdk-go #589 (config update notification)
  - Implement for Ireland
  - Apply hierarchy under "Writable" mirroring that of the non-writable config?
- device-sdk-go #618 (doc updates required)
  - Felix assigned to check this
- device-sdk-go #564 ("Secret store for all")
  - Iain to create equivalent issue in device-sdk-c

CoAP Device Service

- Ken Bannister presented an implementation of a CoAP device service
  - CoAP is used in a wide range of low power devices
  - The device service operates in much the same fashion as device-rest-go
  - New repository to be created in -holding to take this code
  - Presentation is attached to the WG wiki
