

Device and Device SDK Working Group

Notes for January 20 2020

Status updates

- Design for Discovery – changes made in light of feedback. Further review needed at edgex-docs PR #67
- Design for Array types – this is now final
- Internal API changes – to avoid breaking changes in v1.2 we will introduce a new internal API and maintain the old one until v2.0, as we are doing with the REST API
- Visual Inference Device Service – a presentation on this is now scheduled for the meeting on February 3rd
- - `name` flag – not implemented in Go SDK. Issue #435 raised. Implementation in Geneva will depend on the outcome of discussion re: use of the `profile` flag instead
- - `overwrite` flag – not implemented in C SDK. Issue #223 raised. Dave Rensberger has volunteered to fix in Fuji
