

Device and Device SDK Working Group

Notes for January 27 2020

Status updates

- Design for Discovery (edgex-docs PR#67) – updated following feedback
- Internal API changes – proposed v2 CSDK API is at device-sdk-c PR#225 (draft)
- Bluetooth device service – work re-started and progressing issues raised during review

AOB

- edgex-go issue #2272 – return of CBOR data through core-command
 - currently being investigated wrt to Go-based device services. **Iain** to check that the C SDK returns with the correct Content-Type header.
- Metrics collection
 - We wish to expand the metrics collected by various services in Geneva. What might the device services provide?
 - **Iain** to collate previous comments as a basis for discussion at the WG meeting on February 10th
