

# Device and Device SDK Working Group

## Notes for March 28 2022

### GPIO Device Service

- Snap configuration now in place
- Issue whereby reading a pin may reset its value to zero
  - Unclear as to whether this is snap-related but seems unlikely
  - Need to create an issue in any case

### C SDK

- Some security-related features landed
  - Vault seeding from file, secure messagebus
  - CORS in review

### Camera device services

- Reviews in progress
- Need port allocations: will not re-use existing device-camera port

### Next meeting

- April 11<sup>th</sup> (no meeting next week)
