

Device and Device SDK Working Group

Notes for October 28 2019

Release Status

- Go SDK
 - Branch cut for Fuji
 - We aren't required to make Fuji releases (an Edinburgh DS should work with Fuji EdgeX) but are doing so in order to use the updated features
 - The requirement to branch will change when the Pipeline build infrastructure is in place (next release). **Lisa** to provide a document describing the new mechanism
 - Issue #345 can be covered in a release note for 1.1.0, a fix to make the New*Value functions consistent will be included in 1.1.1
 - The other outstanding Fuji issues have also been marked for 1.1.1, this to be released mid-December
- Camera Device service
 - Expected to be released with Fuji on November 13 (**Lisa** to confirm with James)
- Other DSEs with a Fuji release
 - device-bacnet-c is ready but not in the DevOps workqueue
 - and vice-versa for device-grove-c. **Iain** to update Lisa on this status tomorrow
- **Cloud** to update dependencies for the Go services

Next Meeting

- No meeting next week due to F2F in Arizona
- Request to switch meeting times with Certification WG as timing becomes problematic for Taiwan when Daylight Savings ends (no DST in Taiwan). **Jim** to liaise
