Device and Device SDK Working Group

Notes for July 8 2019

Status Updates

- C SDK

  - Fixed issue with JSON library whereby large integers were mishandled

Device updates for Driver

- https://github.com/edgexfoundry/device-sdk-go/issues/276

  - Discussion ongoing: interface details to be confirmed by next week

  - Decided that we would not support a Device changing its profile after being created

Other

- Confirmed that ValueDescriptor removal from the device services is programmed for Fuji; will require sequencing (eg, the SDKs will have an intermediate implementation with switchable ValueDescriptor generation)
