

System Management WG Meeting: 3/5/19

Attendees: Attendees that may have joined after the start of the meeting may not have been captured and listed.

Discussion and action items as a result of meeting in **RED**

Old Business

- Start/stop/restart EdgeX micro services – redesign API and executors
 - PRs merged
 - Design doc updated
- Add CPU usage metrics – merged
 - We'll want to look at potential redesign of metrics through something like executors in future releases
- Add system management API to Go DS SDK
 - Akram WIP
- Add system management API to C DS SDK
- Add system management API to App Services SDK
- Add health/status check of the services to the SMA
 - This will be a call through to the configuration/registry service (Consul)
 - Allows a single point of entry for all EdgeX control plane needs
- Long term road map update (see separate doc for this meeting)
