

## System Management WG Meeting: 9/18/18

**Attendees:** Attendees that may have joined after the start of the meeting may not have been captured and listed.

Discussion and action items as a result of meeting in **RED**

### Old Business

- Joint Security/System management presentation on secure device provisioning.
  - Jay Chetty from Intel will present on Intel's device provisioning proof-of-concept.
- Progress report from Akram Ahmed on the Delhi system management implementation (SMA and MSM API)
  - Quick demo of the state of the work
  - Discussion around start/stop/restart operations – options we are considering and get reaction/opinion
- Jim still has the action item to start to look at types and number of metrics we want to cover post Delhi (Edinburgh)
- Jim still has action item to scope out options that should be explored for translation layers in Edinburgh and beyond (LWM2M, OMADM, Redfish, etc.???)
- Edinburgh Architect's day (Tuesday Oct 23<sup>rd</sup>) will include discussion on scope of EdgeX system management going forward. What parts are EdgeX, what is handled by other system and gap identification for a broader community?

### New Business

- Any??
