# LF Antitrust Policy Notice

EdgeX Foundry meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at EdgeX Foundry meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

# WG Updates

Jim White

# Updates

- New Docker Compose files available
  - for Barcelona release 0.2.0, release 0.2.1, development latest, development CFR
  - See developer scripts repo
- Go Code (core “libraries”, core services, export services - first cuts) available
  - No containers yet (being worked)
  - Early stats (not polished yet - please don't release)
    - The new services are 4-5 times smaller than the existing Java services
    - The new services start up almost 75 times faster than the existing Java services
    - The new services consume 95% less memory compared to the existing Java services.

# CIP

- Met with CIP group 12/19
  - Tony, Jim, Jason Shepherd in attendance from EdgeX side
  - CIP (Civil Infrastructure Platform) is a LF project “focused on establishing an open source ‘base layer’ of industrial grade software to enable the use and implementation of software building blocks in civil infrastructure projects. Currently, civil infrastructure systems are built from the ground up, with little re-use of existing software building blocks”
  - More simply: open source base layer (OSBL) for embedded systems that require super long-term maintenance (SLTS)
  - For EdgeX to run on CIP today, it would require much infrastructure be added, possibly to include:
    - Docker or other deployment technology
    - Java and/or other VM or base application infrastructure,
    - Drivers, etc.

# CIP Recommendation

- While the CIP community would like to see EdgeX running on CIP, there does not appear to be an appetite on their part to build or maintain the infrastructure
- Would members of our community want to do this work - above and beyond EdgeX commitments? Potential in areas like oil/gas, but lift is significant.
- At this time, we advised the CIP community to keep the doors of communication open
  - Recommend connect every 3-6 months (perhaps at the OpenIoT Summit) to revisit
  - Recommend CIP look at trying to get EdgeX running on CIP - help determine the work necessary
  - If a community or customer driver started to request more mutual effort to make this happen, we could accelerate
  - No other immediate action at this time

# Project Contributions Welcome!

- Our objective is to make EdgeX use & deployment pervasive!
- EdgeX success is 100% dependent on the vibrancy of a proactive community
- Getting Involved
  - Project membership growing - want to join contact Philip DesAutels at LF ([pdesautels@linuxfoundation.org](mailto:pdesautels@linuxfoundation.org))
  - First Priority is the MVP - potential contributors please contact [keith@iotechsys.com](mailto:keith@iotechsys.com) (people, equipment, technology)
  - If interested in adding new projects please contact the relevant working group chair

Special thanks to [Dave Bohlman](#) and [KMC Controls](#) for making this awesome kit and how-to guide available to members!!

# Hackathon Events

- Jim White and Tyler Cox putting together hackathon starter kit.
- More coming

# Hackathons: How can you help?

- <https://wiki.edgexfoundry.org/display/FA/Hackathons>
- Provide any local volunteers onsite to help with technical work, potentially help judge, etc. (see list below of known hackathons coming up and locations)
- Sponsor breakfast/lunch/dinner for the participants (usually things like donuts/coffee, pizza lunch or cater sandwiches)
- Sponsor \$ rewards (incentives) for teams that successfully implement projects (these could even be projects that particular sponsors want to see accomplished - we just need them scoped appropriately so as to be something that can be accomplished in a 2 day period)
- Help provide or resource hackathon winner prizes
- Sponsor or provide any swag (t-shirts, mugs, etc.)
- Provide marketing assistance

# Meetups

- Help us grow awareness!
- Present, and Tag, EdgeX in your local IoT Meetups
- <https://www.meetup.com/topics/edgex/>
- Email [info@edgexfoundry.org](mailto:info@edgexfoundry.org) for assistance

# EdgeX Project Organization

# Marketing

- **CTA:** If your company will be demoing technologies that utilize the EdgeX framework, please email [events@edgexfoundry.org](mailto:events@edgexfoundry.org) so that we can add to <https://www.edgexfoundry.org/events/>
- **CTA:** If your company will be presenting EdgeX at an upcoming event/webinar/other, please email [pr@edgexfoundry.org](mailto:pr@edgexfoundry.org) so that we can help promote

# AOB/Cadence

- Meeting Cadence Reminder
  - Currently held weekly at 7am PST on Wednesday's
  - Calls without TSC quorum will still be used to review issues
  
- **Next Meeting: January 10, 2017**
