CIP

Urs Gleim / Nori Fukuyasu

# CIP

- Urs Gleim, CIP Governing Board Chair, Siemens
- Nori Fukuyasu, VP Japan Operations, The Linux Foundation (LF CIP lead)
- Proposal was raised from the members of CIP to collaborate with EdgeX in terms of the long term stable Industry IoT (IIoT) software platform

## GENERAL INTRO ABOUT CIP

CIP launched last year to build and collectively maintain a base software platform (we called it "Base Layer") for IIoT devices and controllers in the systems like power plants, transportation system, factory automation etc.

<https://www.cip-project.org/>

What CIP is aiming to do is 2 things:

- a) Maintain CIP Base Layer (Linux Kernel + Core Packages) for many year (AT LEAST 10 years)
- b) Make the Base Layer "Industrial Grade" (such as RT capability, functional safety, etc)

Reference CIP slide deck presented at ELC Europe:

# CIP

## PROPOSAL TO EDGEX FOUNDRY

CIP recently launched a new sub project under CIP called "CIP CORE".

<https://wiki.linuxfoundation.org/civilinfrastructureplatform/cip-core>

CIP CORE is CIP's reference file system composed by CIP Kernel (4.4 kernel) + Debian package. CIP members thought that this CIP CORE can be a good reference base software stack to run EdgeX Platform.

This should fit really well if EdgeX members will have a products/services that will require a long term stable product life.

## NEXT STEPS

If there is interest from EdgeX, nominate a CIP liaison to lead collaboration discussions from the EdgeX project, and if necessary, establish a CIP liaison mail list

EdgeX TSC will include CIP as a discussion item on next weekly Core WG call (Thursday, November 16)
