IIC Updates

Riaz Zolfonoon

Next steps for planning IIC/EdgeX Workshop

Sept 10-14

Chicago, IL

1. Finalize/approve the agenda (time-sensitive)

a. Notify IIC of our decision

2. Identify the speakers for EdgeX topics

3. Estimate the size of EdgeX attendees and arrange for passes

4. Work with IIC on setting up the exact timing

The time for the workshop comes from the IIC Security Working Group (SWG) track during Chicago meeting. It will be finalized as IIC SWG finalizes its own agenda for Chicago.

5. Start promoting the event

The IIC Marketing can do very little on this since the event is held during their meetings –to stay neutral/fair to other member activities

Note: Just FYI and for planning considerations for those traveling to Chicago: At the same time as IIC meeting, there is also Hannover Messe USA and Intelligent Transportation Forum (ITS) happening in Chicago. On Friday 9/15, IIC and ITS are planning some joint activities.

Proposed Agenda

- 1. Introductions and Workshop Overview (10 min)**
Speakers: SWG Chair, LWG Chair, **EdgeX**
- 2. Overview of the IIC Liaison Working Group (10)**
Speaker: LWG Chair
- 3. Overview of EdgeX Foundry Initiatives/Activities (10)**

Use Cases

Enterprises, government agencies and service providers are starting to experience the benefits of implementing large-scale IoT and Industrial IoT projects. Whether they are reducing the cost of operations, improving safety on work sites and in factories, or building their own connected products to remain closer to their customers, bringing value to them, decision makers need solid business cases to attract funding.

EdgeX Foundry's technology ecosystem makes it easier to roll out robust enterprise IoT and Industrial IoT systems with less risk, given more predictable, proven integration of multiple elements at the very edge of the network, from silicon to sensors, from connectivity to cloud, with security and reliability ensured along the entire system.

EdgeX Foundry's members are working across vertical industries on exciting projects we will share here, along with use cases to stimulate thinking and support creativity and innovation, with practical use cases that stand to save businesses money, while making them more competitive and profitable in an increasingly hyper-connected, digital world.
