

- TSC voted to **approve a new meeting schedule to start Oct 14th**. The schedule is below WG leads are asked to update their meeting time (or work with LF to make the changes).

- Monday 8am: Certification
Monday 9am: DS WG
Tuesday 8am: Marketing
Tuesday 9am: Test WG
Tuesday 10am: Commerce WG (the one meeting that falls outside of the 8-10am time but meets every other week.)
Wednesday 8am: TSC
Wednesday 9am: Security
Thursday 8am: Core
Thursday 9am: DevOps
Friday 8am: System Management WG *
Friday 9am: Application WG

- TSC voted to **approve a new monthly Architect's Meeting** to discuss and address project architectural issues more regularly. The meeting will be **held every 3rd Monday of the Month starting Nov 18th** (Jim to get it on the calendar)

- TSC voted to **approve the Fuji code Freeze and Release dates of Oct 23rd and Nov 13th respectively**. The Fuji release will not include all the security features originally planned. Decision on the future releases and release timing (ex: possibly having a special security release) as well as LTS is postponed until the F2F meeting in November. Fuji will not be an LTS release at this time.

- Discussion on future release dates and how to improve/sharpen our scope and timeline will continue in the upcoming architect's meeting (Chicago) and F2F (Phoenix) in Oct and Nov.

- Regarding the F2F, some updates

- Lenny (Intel) will be run a class on application services and the SDK during the training day. Additional training classes (needs and offers) are sought from the community.
- We do not currently have business topics to discuss at the F2F. Keith Steele plans to take this issue up at the marketing meeting.
- If you would like to attend the architect's day at the F2F, connect with a WG chair or Jim White. Anthony (Dell) and Andre (Redis) are new invites to the Architect's day.

- Keith has requested time for companies offering commercial products and services to do a presentation/show-tell. As TSC meeting is pretty full, decision was made to hold a monthly meeting right before the TSC for people to present their EdgeX related products. A separate meeting also allows LF Edge marketing to advertise to outside-community as well.
