

# Share your page with a team member (step 9 of 9)

Once you've created content you'll want to share it with your team members. Confluence can do all the work for you, just click the **Share** button.

1. Let's tell someone about this page.  
Click the **Share** button at the top right of the page. It looks like this:

The screenshot shows the top navigation bar of a Confluence page with buttons for 'Edit', 'Favourite', 'Watch', and 'Share'. The 'Share' button is highlighted with a callout box. The callout box contains a text input field labeled 'User name, group or email', a larger text area labeled 'Add an optional note', and two buttons at the bottom: 'Share' and 'Cancel'.

2. Type the name of the person or group you want to share the page with.  
You can also enter an email address.
3. Add a message to give the person some background about the page.
4. Click the **Share** button.  
Confluence will send the person an email message about this page. Shared!

**!** The **Share** button only appears if your administrator has configured a mail server. In Confluence Cloud, this is all set up for you.
