

Secrets of GitHub Signing, Keys and Commits Setup

Having trouble negotiating the two phase authentication required by EdgeX Github? Need help with how to sign a commit? Can't figure out how to add a GPG key to your Github account? Eric Cotter from IoT Platform Development Team @ Dell Technologies has provided a very useful guide to help you with these issues and more in this self-help guide: [EdgeXFoundry GitHub SSH GPG 2FA and Signed Commits.pdf](#)
