

Let's edit this page (step 3 of 9)

Pages are the primary means of storing and sharing information in Confluence.
Pages are contained within spaces. This page is in the 'Demonstration Space'.

Let's play with some content. Don't worry, you won't break anything:

1. Click **Edit** at the top of this page. Now you are in the editor.
2. Type some words in the panel below this one.
3. Have some fun:
 - Change the color of some text: Select the text, then choose a color from the color option in the editor tool bar.
 - Add a link: Select some text, then choose the **Link** button on the toolbar.
Click **Web Link** and enter an **Address**, such as <http://www.atlassian.com>.
Click **Insert** to insert the link.
 - Find a file or picture on your computer, and drag it anywhere on this page.
 - Try some of the other options in the editor toolbar.

When you're ready, click **Save** and go to the next step or back to the space home.

Congrats to Takuma Sato for winning the 101st **Indianapolis 500** (an important event in Hoosierland, where we are located). It's fun to hear the Japanese announcers get excited: <http://www.roadandtrack.com/motorsports/a9950008/japanese-announcers-takuma-sato-indy/>. Personally, I'm more interested in the upcoming **Great American Eclipse** (total solar) on 21 August, and am hoping to get our near space balloon up to take some imagery from a different perspective. like from 20 miles up:

This is southern **Michigan** and eastern **Wisconsin**, with **Lake Michigan** that we took with a Canon Sureshot, looking northwest, as the balloon was floating above Angola, Indiana at about 95,000 ft. High altitude balloons are edge devices, you know... - Dave B
